## Handling

Format:	Liquid
Buffer:	PBS
Handling Advice:	<p>Crude antisera are more robust than monoclonals. With anti-microbials added, they may be stored at 4 °C.</p> <p>Serum does not contain active proteases, in fact, serum itself contains a powerful cocktail of protease inhibitors. Frozen storage (-20 °C), however, is preferable.</p>
Storage:	4 °C/-20 °C
Storage Comment:	Unlabeled antibodies are stable in this form without loss of quality at ambient temperatures for several weeks or even months. They can be stored at 4 °C for several years.
