Alternative Name:	secretory carrier membrane protein 3 ( <a href="#">SCAMP3 Products</a> )
Background:	<p>This gene product belongs to the SCAMP family of proteins which are secretory carrier membrane proteins. They function as carriers to the cell surface in post-golgi recycling pathways. Different family members are highly related products of distinct genes, and are usually expressed together. These findings suggest that the SCAMPs may function at the same site during vesicular transport rather than in separate pathways. Two transcript variants encoding different isoforms have been found for this gene.</p> <p>Cellular Localization: Membrane, Multi-pass membrane protein</p>
Molecular Weight:	38 kDa
Gene ID:	10067
UniProt:	<a href="#">O14828</a>
