## **Target Details**

| Alternative Name:   | CKLF like MARVEL transmembrane domain containing 5 (CMTM5 Products)   |  |
|---------------------|---|--|
| Background:         | This gene belongs to the chemokine-like factor gene superfamily. This family of genes encodes multi-pass membrane proteins that are similar to both the chemokine and the transmembrane 4 superfamilies of signaling molecules. Alternate transcriptional splice variants of this gene, encoding different isoforms, have been characterized. |  |
