

## Datasheet for ABIN286068 **anti-Vitamin A antibody**

[Go to Product page](#)

### Overview

Quantity:	1 mL
Target:	Vitamin A
Reactivity:	Please inquire
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This Vitamin A antibody is un-conjugated
Application:	Please inquire

### Product Details

Immunogen: Vitamin A antibody was raised in rabbit using vitamin A as the immunogen.

### Target Details

Target:	Vitamin A
Abstract:	<a href="#">Vitamin A Products</a>
Target Type:	Chemical
Background:	Vitamin A is a vitamin that is needed by the retina of the eye in the form of a specific metabolite, the light-absorbing molecule retinal, that is absolutely necessary for both low-light (scotopic vision) and color vision. Vitamin A also functions in a very different role, as an irreversibly oxidized form of retinol known as retinoic acid, which is an important hormone-like growth factor for epithelial and other cells.

## Application Details

---

Restrictions: For Research Use only

## Handling

---

Format: Liquid

Concentration: Lot specific

Buffer: Neat serum with no preservatives.

Preservative: Without preservative

Handling Advice: Avoid repeated freeze/thaw cycles

Storage: -20 °C

Storage Comment: Store at 4 °C for short term storage. Aliquot and store at -20 °C for long term storage.
