## DNMT Activity / Inhibition Assay

### Overview

Quantity:	96 tests
Application:	Inhibition Assay (InhA)

### Product Details

Specificity:	The DNMT Activity / Inhibition Assay is tested for sensitivity in detecting the level of CpG Methyltransferase enzyme provided as a positive control in the kit.
--------------	--

### Application Details

Comment:	For Lot 21914002 a standard curve was generated using 0.125 - 2 U/well of the provided CpG Methyltransferase with a 1.5 hour incubation and a 3 minute developing time (Figure 1).
Restrictions:	For Research Use only

### Handling

Storage:	-20 °C
Storage Comment:	Components can be stored at -20°C prior to first use, then we recommend storing the components at the temperatures listed in the manual.
