Datasheet for ABIN2866248

Histone 3 ELISA Kit

Overview

Quantity: 96 tests

Target: Histone 3 (H3)

Reactivity: Human

Method Type: Sandwich ELISA

Application: ELISA

Product Details

Purpose: Total Histone H3 ELISA to quantitate total histone H3 levels

Analytical Method: Quantitative

Detection Method: Colorimetric

Specificity: Total Histone H3 ELISA Kits are tested for sensitivity in detecting the level of histone H3 by generating a standard curve using the Recombinant Histone H3 protein provided in the kit.

Components: Total Histone H3 ELISA Kits include a 96-stripwell Histone H3 Capture plate, Total Histone H3 antibody (C-terminal), HRP-conjugated anti-rabbit IgG secondary antibody, Assay Dilution Buffer, 20X Wash Buffer, Developing Solution, Stop Solution, unmodified Recombinant Histone H3 positive control protein and plate sealer.

Target Details

Target: Histone 3 (H3)

Alternative Name: Histone h3 ([H3 Products](#))

Application Details

Application Notes:	Optimal working dilution should be determined by the investigator.
Comment:	Recombinant protein standards are generated in duplicate from 1.56 ng - 100 ng and assayed in the kit according to the protocol listed in the manual. For lot 33013003, a developing time of 2 minutes generated the protein standard curve in Figure 1. The linear range of this lot was plotted in Figure 2. These results are provided for demonstration only. The linear range may vary depending on the developing time used and should be calculated each time a standard curve is run.
Assay Time:	3 h
Plate:	Pre-coated
Restrictions:	For Research Use only

Handling

Storage:	4 °C/-80 °C
Storage Comment:	Store the Recombinant Histone H3 protein at -80°C. All other components should be stored at 4°C. This product is guaranteed for 6 months from date of receipt.
Expiry Date:	6 months
