Alternative Name:	BDNF (BDNF Products)
Background:	Brain-derived neurotrophic factor, also known as BDNF, is a protein that, in humans, is encoded

by the BDNF gene. BDNF is a member of the neurotrophin family of growth factors, which are

Target Details

	related to the canonical Nerve Growth Factor. Neurotrophic factors are found in the brain and the periphery. The effects of BDNF on motor neurons might be useful in treating patients with motor neuropathies and ALS (1-3).
Gene ID:	627
NCBI Accession:	NP_001137277
UniProt:	P23560
Pathways:	RTK Signaling, Synaptic Membrane, Feeding Behaviour, Dicarboxylic Acid Transport, Regulation of long-term Neuronal Synaptic Plasticity

Application Details

Application Notes:	 WB (1:1000) ICC/IF (1:100) optimal dilutions for assays should be determined by the user.
Comment:	A 1:1000 dilution of ABIN2869089 was sufficient for detection of BDNF on 293T Rapamycin-treated lysates using Goat anti-rabbit IgG:HRP as the secondary antibody.
