## Overview

|                      |                                         |
|----------------------|-----------------------------------------|
| Quantity:            | 50 µL                                   |
| Target:              | Resistin (RETN)                         |
| Binding Specificity: | AA 43-65                                |
| Reactivity:          | Human                                   |
| Host:                | Rabbit                                  |
| Clonality:           | Polyclonal                              |
| Conjugate:           | This Resistin antibody is un-conjugated |
| Application:         | Immunohistochemistry (IHC)              |

## Product Details

|               |                                                  |
|---------------|--------------------------------------------------|
| Immunogen:    | 5-10 mg of > 70% pure peptide conjugated to KLH. |
| Purification: | unpurified serum                                 |

## Target Details

|                   |                                                                                  |
|-------------------|----------------------------------------------------------------------------------|
| Target:           | Resistin (RETN)                                                                  |
| Alternative Name: | Resistin ( <a href="#">RETN Products</a> )                                       |
| Pathways:         | <a href="#">Feeding Behaviour</a> , <a href="#">Smooth Muscle Cell Migration</a> |

## Application Details

|                    |                                                                    |
|--------------------|--------------------------------------------------------------------|
| Application Notes: | Optimal working dilution should be determined by the investigator. |
|--------------------|--------------------------------------------------------------------|

Application Details

Restrictions: For Research Use only

Handling

Format: Liquid

Storage: 4 °C,-20 °C

Storage Comment: Store antibodies at 2-4°C before and at -20°C after rehydration. The product is stable for approximately 3-6 weeks after rehydration at -20°C or below.
