## Overview

|              |                                             |
|--------------|---------------------------------------------|
| Quantity:    | 1 mg                                        |
| Target:      | HCG beta                                    |
| Reactivity:  | Human                                       |
| Host:        | Mouse                                       |
| Clonality:   | Monoclonal                                  |
| Conjugate:   | This HCG beta antibody is conjugated to HRP |
| Application: | ELISA, Western Blotting (WB)                |

## Product Details

|            |                                                                              |
|------------|------------------------------------------------------------------------------|
| Immunogen: | hCG beta antibody (HRP) was raised in mouse using hCG beta as the immunogen. |
| Clone:     | M94138-HRP                                                                   |
| Isotype:   | IgG1                                                                         |

## Target Details

|           |                                   |
|-----------|-----------------------------------|
| Target:   | HCG beta                          |
| Abstract: | <a href="#">HCG beta Products</a> |

## Application Details

|                    |                                                              |
|--------------------|--------------------------------------------------------------|
| Application Notes: | Optimal conditions should be determined by the investigator. |
| Comment:           | Affinity Constant: $2 \times 10^{10}$ L/mol                  |

Application Details

Restrictions: For Research Use only

Handling

|                    |                                                                                                                                    |
|--------------------|------------------------------------------------------------------------------------------------------------------------------------|
| Concentration:     | Lot specific                                                                                                                       |
| Buffer:            | Supplied in a protein stabilized buffer PBS, pH 7.6 with 0.02 % thimerosal.                                                        |
| Preservative:      | Thimerosal (Merthiolate)                                                                                                           |
| Precaution of Use: | This product contains thimerosal (merthiolate): a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
| Handling Advice:   | Use of Sodium Azide will inhibit enzyme activity of horseradish peroxidase.<br>Dilute only prior to immediate use.                 |
| Storage:           | 4 °C                                                                                                                               |
