

Datasheet for ABIN289446
anti-Hemagglutinin antibody

[Go to Product page](#)

1 Publication

Overview

Quantity:	100 µg
Target:	Hemagglutinin (HA)
Reactivity:	Influenza Virus
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This Hemagglutinin antibody is un-conjugated
Application:	ELISA, Western Blotting (WB), Immunocytochemistry (ICC)

Product Details

Immunogen:	HA antibody was raised in rabbit using amino acid residues YPYDVPDYA conjugated to KLH as the immunogen.
Isotype:	IgG
Purification:	Affinity chromatography purified

Target Details

Target:	Hemagglutinin (HA)
Alternative Name:	HA (HA Products)
Target Type:	Influenza Protein
Background:	Hemagglutinin refers to a substance that causes red blood cells to agglutinate. This process is called hemagglutination. Examples include antibodies, blood group antigens, autoimmune factors (such as Rh factor), and lectins. Bacteria, viruses, and other parasites can be the source

Target Details

of blood agglutinins as well.

Application Details

Application Notes: ELISA: coating:1:100-1:500, primary:1:1,000-1:30,000, ICC: 1:100-1:400, WB: colorimetric: 1:1,000-1:10,000, chemiluminescent: 1:1,000-1:30,000
Optimal conditions should be determined by the investigator.

Restrictions: For Research Use only

Handling

Format: Liquid

Concentration: Lot specific

Buffer: Supplied as a liquid in PBS, pH 7.2 with 0.1 % NaN₃.

Preservative: Sodium azide

Precaution of Use: This product contains Sodium Azide: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.

Storage: 4 °C
