

## Datasheet for ABIN2946224 **GPA33 ELISA Kit**

[Go to Product page](#)

### Overview

|                          |                        |
|--------------------------|------------------------|
| Quantity:                | 96 tests               |
| Target:                  | GPA33                  |
| Reactivity:              | Human                  |
| Method Type:             | Sandwich ELISA         |
| Detection Range:         | 0.625 ng/mL - 40 ng/mL |
| Minimum Detection Limit: | 0.625 ng/mL            |
| Application:             | ELISA                  |

### Product Details

|                    |                                                                                                          |
|--------------------|----------------------------------------------------------------------------------------------------------|
| Purpose:           | Human Cell surface A33 antigen ELISA Kit is an ELISA kit against Human Cell surface A33 antigen (GPA33). |
| Sample Type:       | Plasma, Serum                                                                                            |
| Analytical Method: | Quantitative                                                                                             |
| Detection Method:  | Colorimetric                                                                                             |

### Target Details

|                   |                                                             |
|-------------------|-------------------------------------------------------------|
| Target:           | GPA33                                                       |
| Alternative Name: | Cell Surface A33 Antigen ( <a href="#">GPA33 Products</a> ) |

# Application Details

Application Notes: Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.

Plate: Pre-coated

Restrictions: For Research Use only

## Handling

Storage: 4 °C/-20 °C

Storage Comment: Upon receipt, store the kit according to the storage instruction in the kit's manual.

Expiry Date: 6 months
