**Mitogen-Activated Protein Kinase (MAPK) ELISA Kit**[Go to Product page](#)

## Overview

Quantity:	96 tests
Target:	Mitogen-Activated Protein Kinase (MAPK)
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	1.56 ng/mL - 100 ng/mL
Minimum Detection Limit:	1.56 ng/mL
Application:	ELISA

## Product Details

Purpose:	Human Mitogen Activated Protein Kinase 14 ELISA Kit is an ELISA Kit against Mitogen Activated Protein Kinase 14.
Sample Type:	Plasma, Serum
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Sensitivity:	0.94 ng/mL

## Target Details

Target:	Mitogen-Activated Protein Kinase (MAPK)
Alternative Name:	Mitogen Activated Protein Kinase ( <a href="#">MAPK Products</a> )
Pathways:	<a href="#">VEGF Signaling</a>

## Application Details

---

**Application Notes:**                      **Stability:** The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.

Standard Form: Lyophilized

---

**Plate:**                                      Pre-coated

---

**Restrictions:**                            For Research Use only

---

## Handling

---

**Storage:**                                  4 °C/-20 °C

---

**Storage Comment:**                      Upon receipt, store the kit according to the storage instruction in the kit's manual.

---

**Expiry Date:**                              6 months

---
