### **NAT5 ELISA Kit**

[Go to Product page](#)

#### Overview

Quantity:	96 tests
Target:	NAT5
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	1.56 ng/mL - 100 ng/mL
Minimum Detection Limit:	1.56 ng/mL
Application:	ELISA

#### Product Details

Purpose:	Human N-alpha-acetyltransferase 20 ELISA Kit is an ELISA kit against Human N-alpha-acetyltransferase 20 (NAA20).
Sample Type:	Plasma, Serum
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Sensitivity:	< 0.98 ng/mL

#### Target Details

Target:	NAT5
Alternative Name:	N-alpha-Acetyltransferase 20 ( <a href="#">NAT5 Products</a> )

## Application Details

---

Application Notes:                      Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.

---

Plate:                                        Pre-coated

---

Restrictions:                              For Research Use only

---

## Handling

---

Storage:                                    4 °C/-20 °C

---

Storage Comment:                        Upon receipt, store the kit according to the storage instruction in the kit's manual.

---

Expiry Date:                               6 months

---
