

Datasheet for ABIN2949776 **MME ELISA Kit**

[Go to Product page](#)

Overview

Quantity: 96 tests

Target: MME

Reactivity: Human

Method Type: Sandwich ELISA

Detection Range: 0.156 ng/mL - 10 ng/mL

Minimum Detection Limit: 0.156 ng/mL

Application: ELISA

Product Details

Purpose: Human Neprilysin ELISA Kit is an ELISA Kit against Neprilysin.

Sample Type: Plasma, Serum

Analytical Method: Quantitative

Detection Method: Colorimetric

Sensitivity: 0.1 ng/mL

Target Details

Target: MME

Alternative Name: Neprilysin ([MME Products](#))

Target Type: Chemical

Pathways: [RTK Signaling](#), [Peptide Hormone Metabolism](#), [Regulation of Systemic Arterial Blood Pressure](#)

Target Details

by Hormones, Smooth Muscle Cell Migration

Application Details

Application Notes: Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.

Standard Form: Lyophilized

Plate: Pre-coated

Restrictions: For Research Use only

Handling

Storage: 4 °C/-20 °C

Storage Comment: Upon receipt, store the kit according to the storage instruction in the kit's manual.

Expiry Date: 6 months
