

Datasheet for ABIN2949954 **NOG ELISA Kit**

[Go to Product page](#)

Overview

Quantity:	96 tests
Target:	NOG
Reactivity:	Human, Mouse, Rat
Method Type:	Sandwich ELISA
Detection Range:	0.156 ng/mL - 10 ng/mL
Minimum Detection Limit:	0.156 ng/mL
Application:	ELISA

Product Details

Purpose:	<p>Noggin ELISA Kit is a sandwich ELISA kit for use with Serum, plasma, tissue homogenates and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Noggin (NOG)</p> <p>No significant cross-reactivity or interference between Noggin (NOG) and analogues was observed. This kit is suitable for use with human, mouse and rat noggin.</p>
Sample Type:	Plasma, Serum, Tissue Homogenate
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Sensitivity:	< 0.057 ng/mL

Target Details

Target:	NOG
---------	-----

Target Details

Abstract: [NOG Products](#)

Pathways: [Stem Cell Maintenance, Tube Formation](#)

Application Details

Application Notes: Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.
Standard Form: Lyophilized

Plate: Pre-coated

Restrictions: For Research Use only

Handling

Storage: 4 °C/-20 °C

Storage Comment: Upon receipt, store the kit according to the storage instruction in the kit's manual.

Expiry Date: 6 months
