

## Datasheet for ABIN2950996 **PKLR ELISA Kit**

[Go to Product page](#)

### Overview

Quantity:	96 tests
Target:	PKLR
Reactivity:	Human
Method Type:	Sandwich ELISA
Detection Range:	0.781 ng/mL - 50 ng/mL
Minimum Detection Limit:	0.781 ng/mL
Application:	ELISA

### Product Details

Purpose:	Human Pyruvate Kinase, Liver And RBC ELISA Kit is an ELISA Kit against Pyruvate Kinase, Liver And RBC.
Sample Type:	Plasma, Serum
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Sensitivity:	0.47 ng/mL
Characteristics:	Pyruvate Kinase, Liver And RBC

### Target Details

Target:	PKLR
Alternative Name:	Pyruvate Kinase, Liver And RBC ( <a href="#">PKLR Products</a> )

## Target Details

---

Pathways: [Ribonucleoside Biosynthetic Process](#)

## Application Details

---

Application Notes: Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.  
Standard Form: Lyophilized

---

Plate: Pre-coated

---

Restrictions: For Research Use only

## Handling

---

Storage: 4 °C/-20 °C

---

Storage Comment: Upon receipt, store the kit according to the storage instruction in the kit's manual.

---

Expiry Date: 6 months
