

## Datasheet for ABIN2951027

### **RAB14 ELISA Kit**

[Go to Product page](#)

#### Overview

|                          |                       |
|--------------------------|-----------------------|
| Quantity:                | 96 tests              |
| Target:                  | RAB14                 |
| Reactivity:              | Human                 |
| Method Type:             | Sandwich ELISA        |
| Detection Range:         | 0.78 ng/mL - 50 ng/mL |
| Minimum Detection Limit: | 0.78 ng/mL            |
| Application:             | ELISA                 |

#### Product Details

|                    |                                                                                                              |
|--------------------|--------------------------------------------------------------------------------------------------------------|
| Purpose:           | Human Ras-related protein Rab-14 ELISA Kit is an ELISA kit against Human Ras-related protein Rab-14 (RAB14). |
| Sample Type:       | Plasma, Serum                                                                                                |
| Analytical Method: | Quantitative                                                                                                 |
| Detection Method:  | Colorimetric                                                                                                 |

#### Target Details

|                   |                                                                                                  |
|-------------------|--------------------------------------------------------------------------------------------------|
| Target:           | RAB14                                                                                            |
| Alternative Name: | Ras-Related Protein Rab-14 ( <a href="#">RAB14 Products</a> )                                    |
| Pathways:         | <a href="#">Asymmetric Protein Localization</a> , <a href="#">SARS-CoV-2 Protein Interactome</a> |

Application Details

Application Notes: Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.

Plate: Pre-coated

Restrictions: For Research Use only

Handling

Storage: 4 °C/-20 °C

Storage Comment: Upon receipt, store the kit according to the storage instruction in the kit's manual.

Expiry Date: 6 months
