

## Datasheet for ABIN2952172

### HVEM ELISA Kit

[Go to Product page](#)

#### Overview

|                          |                         |
|--------------------------|-------------------------|
| Quantity:                | 96 tests                |
| Target:                  | HVEM (TNFRSF14)         |
| Reactivity:              | Human                   |
| Method Type:             | Competition ELISA       |
| Detection Range:         | 31.2 pg/mL - 2000 pg/mL |
| Minimum Detection Limit: | 31.2 pg/mL              |
| Application:             | ELISA                   |

#### Product Details

|                    |                                                                                                                                                                     |
|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Purpose:           | Human Tumor necrosis factor receptor superfamily member 14 ELISA Kit is an ELISA kit against Human Tumor necrosis factor receptor superfamily member 14 (TNFRSF14). |
| Sample Type:       | Plasma, Serum                                                                                                                                                       |
| Analytical Method: | Quantitative                                                                                                                                                        |
| Detection Method:  | Colorimetric                                                                                                                                                        |
| Sensitivity:       | < 15 pg/mL                                                                                                                                                          |

#### Target Details

|                   |                                                                                            |
|-------------------|--------------------------------------------------------------------------------------------|
| Target:           | HVEM (TNFRSF14)                                                                            |
| Alternative Name: | Tumor Necrosis Factor Receptor Superfamily Member 14 ( <a href="#">TNFRSF14 Products</a> ) |
| Target Type:      | Viral Protein                                                                              |

## Target Details

---

Pathways: [Production of Molecular Mediator of Immune Response, Cancer Immune Checkpoints](#)

## Application Details

---

Application Notes: Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.

Plate: Pre-coated

Restrictions: For Research Use only

## Handling

---

Storage: 4 °C/-20 °C

Storage Comment: Upon receipt, store the kit according to the storage instruction in the kit's manual.

Expiry Date: 6 months
