

# Datasheet for ABIN302014

# anti-CD86 antibody (FITC)

**Publications** 

Go to Product page

### Overview

Quantity:	100 tests
Target:	CD86
Reactivity:	Human
Host:	Mouse
Clonality:	Monoclonal
Conjugate:	This CD86 antibody is conjugated to FITC
Application:	Flow Cytometry (FACS)

### **Product Details**

Immunogen:	B-lymphoblastoid cell line ARH 77
Clone:	BU63
Isotype:	IgG1
Specificity:	The mouse monoclonal antibody BU63 reacts with an extracellular epitope of CD86 (B7-2), a 70 kDa type I transmembrane glycoprotein of immunoglobulin supergene family, expressed on professional antigen-presenting cells, such as dendritic cells, macrophages or activated B lymphocytes.
Cross-Reactivity (Details):	Human, Other not determined
Purification:	Purified antibody is conjugated with fluorescein isothiocyanate (FITC) under optimum conditions and unconjugated antibody and free fluorochrome are removed by size-exclusion chromatography.

# **Target Details**

Target:	CD86
Alternative Name:	CD86 (CD86 Products)
Background:	CD86 Molecule,CD80 (B7-1) and CD86 (B7-2) are ligands of T cell critical costimulatory
	molecule CD28 and of an inhibitory receptor CTLA-4 (CD152). The both B7 Molecules are
	expressed on professional antigen-presenting cells and are essential for T cell activation, the
	both molecules can also substitute for each other in this process. The question what are the
	differences in CD80 and CD86 competency has not been fully elucidated yet, there are still
	conflicts in results about their respective roles in initiation or sustaining of the T cell immune
	response.,B7-2, FUN-1, LAB72
Gene ID:	942
UniProt:	P42081
Pathways:	TCR Signaling, Fc-epsilon Receptor Signaling Pathway, EGFR Signaling Pathway, Neurotrophin
	Signaling Pathway, Activation of Innate immune Response, Cellular Response to Molecule of
	Bacterial Origin, Positive Regulation of Immune Effector Process, Activated T Cell Proliferation
Application Details	
Application Notes:	Flow cytometry: The reagent is designed for analysis of human blood cells using 20 µL reagent
	/ 100 $\mu L$ of whole blood or $10^6$ cells in a suspension. The content of a vial (2 ml) is sufficient for
	100 tests.
Comment:	The purified antibody is conjugated with Fluorescein isothiocyanate (FITC) under optimum
	conditions. The reagent is free of unconjugated FITC and adjusted for direct use. No
	reconstitution is necessary.
Restrictions:	For Research Use only
Handling	
Reconstitution:	No reconstitution is necessary.
Buffer:	Stabilizing phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which
	should be handled by trained staff only.
Handling Advice:	Do not freeze.

#### Handling

	Avoid prolonged exposure to light.
Storage:	4 °C
Storage Comment:	Store at 2-8°C. Protect from prolonged exposure to light. Do not freeze.
