Target Details

Target:	Uroplakin 3A (UPK3A)
Alternative Name:	Uroplakin 3A (UPK3A Products)
Background:	Uroplakin 3A (UPK3A) is a component of the asymmetric unit membrane (AUM). It is a highly specialized bio-membrane made by terminally differentiated urothelial cells. Uroplakin 3A may play an important role in AUM-cytoskeleton interaction in terminally differentiated urothelial

Target Details

cells. It also contributes to the formation of urothelial glycocalyx, which may play an important role in preventing bacterial adherence through FimH bacterial protein binding leading to bladder infection. Uroplakin 3A has been shown as a helpful marker for the detection of bladder cancer.

Gene ID: 7380
