Product Details

Purpose:	CD235a Unconjugated Antibody
Immunogen:	Recombinant human glycophorin A protein
Clone:	GYPA280
Isotype:	IgG1, kappa
Characteristics:	CD235a recognises a 39 kd sialoglycoprotein identified as glycophorin A. It is abundantly expressed on red blood cells and erythroid precursor cells. It has been shown that glycophorin acts on the erythrocyte binding antigen (EBA-175) of <i>P. falciparum</i> as well as the receptor for Sandei virus, parvovirus, influenza virus and hepatitis A virus. Two types of glycoproteins are identified and classified as glycophorin A (GPA) and glycophorin B (GPB). Both are trans-membrane sialoglycoproteins. GPA is the carrier of M and N antigens specific blood group whereas GPB is for the S and U specificities.
Purification:	Purified
