Quantity:	1 mg
Target:	TRPV6
Protein Characteristics:	AA 618-765
Origin:	Human
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This TRPV6 protein is labelled with His tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)
Product Details	
Sequence:	MGDTHWRVAH ERDELWRAQI VATTVMLERK LPRCLWPRSG ICGREYGLGD RWFLRVEDRQ
	DLNRQRIQRY AQAFHTRGSE DLDKDSVEKL ELGCPFSPHL SLPMPSVSRS TSRSSANWER
	DLNRQRIQRY AQAFHTRGSE DLDKDSVEKL ELGCPFSPHL SLPMPSVSRS TSRSSANWER LRQGTLRRDL RGIINRGLED GESWEYQI
	LRQGTLRRDL RGIINRGLED GESWEYQI
Characteristics:	LRQGTLRRDL RGIINRGLED GESWEYQI Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a special request, please contact us. • Made in Germany - from design to production - by highly experienced protein experts.

made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

In the unlikely event that the protein cannot be expressed or purified we do not charge anything (other companies might charge you for any performed steps in the expression process for custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression experiments or purification optimization).

When you order this made-to-order protein you will only pay upon receival of the correctly folded protein. With no financial risk on your end you can rest assured that our experienced protein experts will do everything to make sure that you receive the protein you ordered.

The concentration of our recombinant proteins is measured using the absorbance at 280nm.

The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.

The concentration of the protein is calculated using its specific absorption coefficient. We use the Expasy's protparam tool to determine the absorption coefficient of each protein.

Purification:

Two step purification of proteins expressed in bacterial culture:

- 1. In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.
- 2. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.

Purity:

>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.

Sterility:

0.22 µm filtered

Endotoxin Level:

Endotoxin has not been removed. Please contact us if you require endotoxin removal.

Grade:

Crystallography grade

Target Details

Target:	TRPV6
Alternative Name:	TRPV6 (TRPV6 Products)
Background:	Calcium selective cation channel probably involved in Ca(2+) uptake in various tissues,
	including Ca(2+) reabsorption in intestine. The channel is activated by low internal calcium level,
	probably including intracellular calcium store depletion, and the current exhibits an inward
	rectification. Inactivation includes both, a rapid Ca(2+)-dependent and a slower Ca(2+)-

Target Details	
	calmodulin-dependent mechanism, the latter may be regulated by phosphorylation. In vitro, is slowly inhibited by Mg(2+) in a voltage-independent manner. Heteromeric assembly with TRPV5 seems to modify channel properties. TRPV5-TRPV6 heteromultimeric concatemers exhibit voltage-dependent gating (By similarity). {ECO:0000250 UniProtKB:Q91WD2, ECO:0000269 PubMed:11097838, ECO:0000269 PubMed:11248124, ECO:0000269 PubMed:15184369, ECO:0000269 PubMed:23612980}.
Molecular Weight:	18.4 kDa Including tag.
UniProt:	Q9H1D0
Pathways:	TCR Signaling
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
