## Datasheet for ABIN3074761 TOR1AIP2 Protein (AA 236-470) (His tag)

Overview

Quantity:	1 mg
Target:	TOR1AIP2
Protein Characteristics:	AA 236-470
Origin:	Human
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This TOR1AIP2 protein is labelled with His tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)

## Product Details

Sequence:	NSYYSSPAQQ VPKNPALEAF LAQFSQLEDK FPGQSSFLWQ RGRKFLQKHL NASNPTEPAT
	IIFTAAREGR ETLKCLSHHV ADAYTSSQKV SPIQIDGAGR TWQDSDTVKL LVDLELSYGF
	ENGQKAAVVH HFESFPAGST LIFYKYCDHE NAAFKDVALV LTVLLEEETL EASVGPRETE
	EKVRDLLWAK FTNSDTPTSF NHMDSDKLSG LWSRISHLVL PVQPVSSIEE QGCLF
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.

	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in bacterial culture:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 μm filtered
Endotoxin Level:	Endotoxin has not been removed. Please contact us if you require endotoxin removal.
Grade:	Crystallography grade
Target Details	
Target:	TOR1AIP2
Alternative Name:	TOR1AIP2 (TOR1AIP2 Products)
Background:	Required for endoplasmic reticulum integrity. Regulates the distribution of TOR1A between the

endoplasmic reticulum and the nuclear envelope as well as induces TOR1A, TOR1B and TOR3A

ATPase activity. {ECO:0000269|PubMed:19339278, ECO:0000269|PubMed:23569223,

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/4 | Product datasheet for ABIN3074761 | 09/11/2023 | Copyright antibodies-online. Target Details		
	ECO:0000269 PubMed:24275647}.	
Molecular Weight:	27.3 kDa Including tag.	
UniProt:	Q8NFQ8	
Application Details		
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.	
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.	
Restrictions:	For Research Use only	
Handling		
Format:	Liquid	
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.	
Handling Advice:	Avoid repeated freeze-thaw cycles.	
Storage:	-80 °C	
Storage Comment:	Store at -80°C.	
Expiry Date:	Unlimited (if stored properly)
