Datasheet for ABIN3075239 UBXN2B Protein (AA 2-331) (His tag)

Image

Overview

Quantity:	1 mg
Target:	UBXN2B
Protein Characteristics:	AA 2-331
Origin:	Human
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This UBXN2B protein is labelled with His tag.
Application:	ELISA, SDS-PAGE (SDS), Western Blotting (WB), Crystallization (Crys)

Product Details

Sequence:	AEGGGPEPGE QERRSSGPRP PSARDLQLAL AELYEDEVKC KSSKSNRPKA TVFKSPRTPP
	QRFYSSEHEY SGLNIVRPST GKIVNELFKE AREHGAVPLN EATRASGDDK SKSFTGGGYR
	LGSSFCKRSE YIYGENQLQD VQILLKLWSN GFSLDDGELR PYNEPTNAQF LESVKRGEIP
	LELQRLVHGG QVNLDMEDHQ DQEYIKPRLR FKAFSGEGQK LGSLTPEIVS TPSSPEEEDK
	SILNAVVLID DSVPTTKIQI RLADGSRLIQ RFNSTHRILD VRNFIVQSRP EFAALDFILV TSFPNKELTD
	ESLTLLEADI LNTVLLQQLK
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a special request, please contact us.

Product Details	
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in bacterial culture:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE.2. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Endotoxin has not been removed. Please contact us if you require endotoxin removal.
Grade:	Crystallography grade
Target Details	
Target:	UBXN2B

5	
Alternative Name:	UBXN2B (UBXN2B Products)
Background:	Adapter protein required for Golgi and endoplasmic reticulum biogenesis. Involved in Golgi and

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/4 | Product datasheet for ABIN3075239 | 09/11/2023 | Copyright antibodies-online. All rights reserved.

	endoplasmic reticulum maintenance during interphase and in their reassembly at the end of
	mitosis. The complex formed with VCP has membrane fusion activity, membrane fusion
	activity requires USO1-GOLGA2 tethering and BET1L. VCPIP1 is also required, but not its
	deubiquitinating activity. {ECO:0000269 PubMed:17141156}.
Molecular Weight:	37.9 kDa Including tag.
UniProt:	Q14CS0
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a
	guarantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be
	insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to
	increase solubility. We will discuss all possible options with you in detail to assure that you
	receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
