antibodies

## Datasheet for ABIN3075375 Vitronectin Protein (VTN) (AA 20-398) (His tag)

Overview

Image

| Quantity:                     | 1 mg                                                                 |
|-------------------------------|----------------------------------------------------------------------|
| Target:                       | Vitronectin (VTN)                                                    |
| Protein Characteristics:      | AA 20-398                                                            |
| Origin:                       | Human                                                                |
| Source:                       | Insect Cells                                                         |
| Protein Type:                 | Recombinant                                                          |
| Purification tag / Conjugate: | This Vitronectin protein is labelled with His tag.                   |
| Application:                  | Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys) |

|                   | State-of-the-art algorithm used for plasmid design (Gene synthesis).                                                          |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------|
|                   | This protein is a made to order protein and will be made for the first time for your order. Our                               |
|                   | experts in the lab will ensure that you receive a correctly folded protein.                                                   |
|                   | The big advantage of ordering our made-to-order proteins in comparison to ordering custom                                     |
|                   | made proteins from other companies is that there is no financial obligation in case the protein                               |
|                   | cannot be expressed or purified.                                                                                              |
|                   | In the unlikely event that the protein cannot be expressed or purified we do not charge anything                              |
|                   | (other companies might charge you for any performed steps in the expression process for                                       |
|                   | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression                                  |
|                   | experiments or purification optimization).                                                                                    |
|                   | When you order this made-to-order protein you will only pay upon receival of the correctly                                    |
|                   | folded protein. With no financial risk on your end you can rest assured that our experienced                                  |
|                   | protein experts will do everything to make sure that you receive the protein you ordered.                                     |
|                   | The concentration of our recombinant proteins is measured using the absorbance at 280nm.                                      |
|                   | The protein's absorbance will be measured in several dilutions and is measured against its                                    |
|                   | specific reference buffer.                                                                                                    |
|                   | The concentration of the protein is calculated using its specific absorption coefficient. We use                              |
|                   | the Expasy's protparam tool to determine the absorption coefficient of each protein.                                          |
| Purification:     | Two step purification of proteins expressed in baculovirus infected SF9 insect cells:                                         |
|                   | 1. In a first purification step, the protein is purified from the cleared cell lysate using three                             |
|                   | different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE. |
|                   | 2. Protein containing fractions of the best purification are subjected to second purification step                            |
|                   | through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and                                          |
|                   | Western blot.                                                                                                                 |
| Purity:           | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.                                              |
| Sterility:        | 0.22 µm filtered                                                                                                              |
| Endotoxin Level:  | Protein is endotoxin free.                                                                                                    |
| Grade:            | Crystallography grade                                                                                                         |
| Target Details    |                                                                                                                               |
|                   |                                                                                                                               |
| Target:           | Vitronectin (VTN)                                                                                                             |
| Alternative Name: | VTN (VTN Products)                                                                                                            |

| Target Details      |                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|---------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Background:         | Vitronectin is a cell adhesion and spreading factor found in serum and tissues. Vitronectin interact with glycosaminoglycans and proteoglycans. Is recognized by certain members of the integrin family and serves as a cell-to-substrate adhesion molecule. Inhibitor of the membrane-damaging effect of the terminal cytolytic complement pathway., Somatomedin-B is a growth hormone-dependent serum factor with protease-inhibiting activity. |
| Molecular Weight:   | 44.0 kDa Including tag.                                                                                                                                                                                                                                                                                                                                                                                                                           |
| UniProt:            | P04004                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Pathways:           | Autophagy, Smooth Muscle Cell Migration                                                                                                                                                                                                                                                                                                                                                                                                           |
| Application Details |                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies<br>as well. As the protein has not been tested for functional studies yet we cannot offer a<br>guarantee though.                                                                                                                                                                                                                                |
| Comment:            | In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.                                                                                                                   |
| Restrictions:       | For Research Use only                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Handling            |                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Format:             | Liquid                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Buffer:             | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.                                                                                                                                                                                                                                                                                                                                                        |
| Handling Advice:    | Avoid repeated freeze-thaw cycles.                                                                                                                                                                                                                                                                                                                                                                                                                |
| Storage:            | -80 °C                                                                                                                                                                                                                                                                                                                                                                                                                                            |
