antibodies

Datasheet for ABIN3075392 VPREB1 Protein (AA 20-145) (His tag)

Overview

Quantity:	1 mg
Target:	VPREB1
Protein Characteristics:	AA 20-145
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This VPREB1 protein is labelled with His tag.
Application:	SDS-PAGE (SDS), Western Blotting (WB), ELISA, Crystallization (Crys)
Product Details	
Sequence:	QPVLHQPPAM SSALGTTIRL TCTLRNDHDI GVYSVYWYQQ RPGHPPRFLL RYFSQSDKSQ
	GPQVPPRFSG SKDVARNRGY LSISELQPED EAMYYCAMGA RSSEKEERER EWEEEMEPTA
	ARTRVP
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.
	Human VPREB1 Protein (raised in Insect Cells) purified by multi-step, protein-specific
	process to ensure crystallization grade.
	 State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our
	This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.

roteins from other companies is that there is no financial obligation in case the protein be expressed or purified. Inlikely event that the protein cannot be expressed or purified we do not charge anything companies might charge you for any performed steps in the expression process for n-made proteins, e.g. fees might apply for the expression plasmid, the first expression nents or purification optimization). Ou order this made-to-order protein you will only pay upon receival of the correctly protein. With no financial risk on your end you can rest assured that our experienced expects will do eventhing to make sure that you receive the protein you ordered

protein. With no financial risk on your end you can rest assured that our experienced
experts will do everything to make our that you reasive the protein you ordered
experts will do everything to make sure that you receive the protein you ordered.
ncentration of our recombinant proteins is measured using the absorbance at 280nm.
tein's absorbance will be measured in several dilutions and is measured against its
reference buffer.
ncentration of the protein is calculated using its specific absorption coefficient. We use
asy's protparam tool to determine the absorption coefficient of each protein.
ep purification of proteins expressed in baculovirus infected SF9 insect cells:
irst purification step, the protein is purified from the cleared cell lysate using three rent His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate ions are analyzed by SDS-PAGE.
ein containing fractions of the best purification are subjected to second purification step ugh size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and ern blot.
as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
n filtered
is endotoxin free.
ography grade
1
1 (VPREB1 Products)
ates with the Ig-mu chain to form a molecular complex that is expressed on the surface
B-cells. This complex presumably regulates Ig gene rearrangements in the early steps of
ifferentiation.

Target Details	
UniProt:	P12018
Pathways:	Production of Molecular Mediator of Immune Response, Regulation of Cell Size
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.

Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
