

## Datasheet for ABIN3076332 ZNF431 Protein (AA 1-576) (Strep Tag)

Overview

Quantity:	250 µg
Target:	ZNF431
Protein Characteristics:	AA 1-576
Origin:	Human
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This ZNF431 protein is labelled with Strep Tag.
Application:	ELISA, SDS-PAGE (SDS), Western Blotting (WB)

## Product Details

Brand:	AliCE®
Sequence:	MDDLKYGVYP LKEASGCPGA ERNLLVYSYF EKETLTFRDV AIEFSLEEWE CLNPAQQNLY
	MNVMLENYKN LVFLGVAVSK QDPVTCLEQE KEPWNMKRHE MVDEPPAMCS YFTKDLWPEQ
	DIKDSFQQVI LRRYGKCEHE NLQLRKGSAS VDEYKVHKEG YNELNQCLTT TQSKIFPCDK
	YVKVFHKFLN ANRHKTRHTG KKPFKCKKCG KSFCMLLHLS QHKRIHIREN SYQCEECGKA
	FKWFSTLTRH KRIHTGEKPF KCEECGKAFK QSSTLTTHKI IHTGEKPYRC EECGKAFNRS
	SHLTTHKIIH TGEKPYKCEE CGKAFNQSST LSTHKFIHAG EKPYKCEECD KAFNRFSYLT
	KHKIIHTGEK SYKCEECGKG FNWSSTLTKH KRIHTGEKPY KCEVCGKAFN ESSNLTTHKM
	IHTGEKPYKC EECGKAFNRS PQLTAHKIIH TGEKPYKCEE CGKAFSQSSI LTTHKRIHTG
	EKPYKCEECG KAFNRSSNLT KHKIIHTGEK SYKCEECGKA FNQSSTLTKH RKIHTRQKPY
	NCEECDNTFN QSSNLIKQNN SYWRETLQMS RMWESL
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression

	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.
Characteristics:	Key Benefits:
	<ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Protein expressed with ALICE® and purified in one-step affinity chromatography</li> <li>These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul>
	This protein is a <b>made-to-order protein</b> and will be made for the first time for your order. Our
	experts in the lab try to ensure that you receive soluble protein.
	The big advantage of ordering our <b>made-to-order proteins</b> in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	Expression System:
	<ul> <li>ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications.</li> <li>During lysate production, the cell wall and other cellular components that are not required fo protein production are removed, leaving only the protein production machinery and the mitochondria to drive the reaction. During our lysate completion steps, the additional components needed for protein production (amino acids, cofactors, etc.) are added to produce something that functions like a cell, but without the constraints of a living system - all that's needed is the DNA that codes for the desired protein!</li> </ul>
	Concentration:
	<ul> <li>The concentration of our recombinant proteins is measured using the absorbance at 280nm</li> <li>The protein's absorbance will be measured against its specific reference buffer.</li> <li>We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.</li> </ul>
Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).

Grade:

custom-made

## Target Details

Target:	ZNF431
Alternative Name:	ZNF431 (ZNF431 Products)
Background:	Zinc finger protein 431,FUNCTION: Sequence-specific DNA binding transcriptional repressor. Represses target gene transcription by recruiting HDAC1 and HDAC2 histone deacetylases. Acts as a specific transcriptional repressor for PTCH1 during embryonic development. Required for osteoblast differentiation and sonic hedgehog/SHH signaling response. Binds to the consensus site 5'-GCGCCC-3' in the promoter of PTCH1 (By similarity). {ECO:0000250}.
Molecular Weight:	67.2 kDa
UniProt:	Q8TF32
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Comment:	ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications.
	During lysate production, the cell wall and other cellular components that are not required for protein production are removed, leaving only the protein production machinery and the mitochondria to drive the reaction. During our lysate completion steps, the additional components needed for protein production (amino acids, cofactors, etc.) are added to produce something that functions like a cell, but without the constraints of a living system - all that's needed is the DNA that codes for the desired protein!
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer.

Duffer.	The burler composition is at the discretion of the manufacturer.
	Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol Might differ depending on protein.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
