Datasheet for ABIN3076867 SEZ6L2 Protein (AA 28-844) (His tag)

Image

Overview

Quantity:	1 mg
Target:	SEZ6L2
Protein Characteristics:	AA 28-844
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This SEZ6L2 protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)

Product Details

EVTITCVPGH PSQWTSQPPL CKVTQTTDPS RQLEGGN Sequence without tag. Tag location is at the discretion of the manufacturer. If you h special request, please contact us. Characteristics: • Made in Germany - from design to production - by highly experienced protein experts • Human SEZ6L2 Protein (raised in Insect Cells) purified by multi-step, protein-specific	5.
special request, please contact us. Characteristics: • Made in Germany - from design to production - by highly experienced protein experts	5.
Characteristics: • Made in Germany - from design to production - by highly experienced protein experts	
 to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis). 	
This protein is a made to order protein and will be made for the first time for your order	r. Our
experts in the lab will ensure that you receive a correctly folded protein.	
The big advantage of ordering our made-to-order proteins in comparison to ordering cu	ustom
made proteins from other companies is that there is no financial obligation in case the	protein
cannot be expressed or purified.	
In the unlikely event that the protein cannot be expressed or purified we do not charge	anything
(other companies might charge you for any performed steps in the expression process	s for
custom-made proteins, e.g. fees might apply for the expression plasmid, the first expre	ession
experiments or purification optimization).	
When you order this made-to-order protein you will only pay upon receival of the correc	otly
folded protein. With no financial risk on your end you can rest assured that our experier	nced
protein experts will do everything to make sure that you receive the protein you ordered	J.
The concentration of our recombinant proteins is measured using the absorbance at 2	.80nm.
The protein's absorbance will be measured in several dilutions and is measured agains	st its
specific reference buffer.	
The concentration of the protein is calculated using its specific absorption coefficient.	We use
the Expasy's protparam tool to determine the absorption coefficient of each protein.	
Purification: Two step purification of proteins expressed in baculovirus infected SF9 insect cells:	
 In a first purification step, the protein is purified from the cleared cell lysate using thr different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluat fractions are analyzed by SDS-PAGE. Protein containing fractions of the best purification are subjected to second purificat through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE Western blot. 	te tion step
Durity	
Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.	
Sterility: 0.22 µm filtered	
Endotoxin Level: Protein is endotoxin free.

Product Details

Grade:

Crystallography grade

Target Details

0	
Target:	SEZ6L2
Alternative Name:	SEZ6L2 (SEZ6L2 Products)
Background:	May contribute to specialized endoplasmic reticulum functions in neurons. {ECO:0000250}.
Molecular Weight:	88.4 kDa Including tag.
UniProt:	Q6UXD5
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
