## Datasheet for ABIN3076913 SIRPG Protein (AA 29-360) (His tag)

I Image

## Overview

Quantity:	1 mg
Target:	SIRPG
Protein Characteristics:	AA 29-360
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This SIRPG protein is labelled with His tag.
Application:	SDS-PAGE (SDS), Western Blotting (WB), ELISA, Crystallization (Crys)

## Product Details

Sequence:	EEELQMIQPE KLLLVTVGKT ATLHCTVTSL LPVGPVLWFR GVGPGRELIY NQKEGHFPRV
	TTVSDLTKRN NMDFSIRISS ITPADVGTYY CVKFRKGSPE NVEFKSGPGT EMALGAKPSA
	PVVLGPAART TPEHTVSFTC ESHGFSPRDI TLKWFKNGNE LSDFQTNVDP TGQSVAYSIR
	STARVVLDPW DVRSQVICEV AHVTLQGDPL RGTANLSEAI RVPPTLEVTQ QPMRVGNQVN
	VTCQVRKFYP QSLQLTWSEN GNVCQRETAS TLTENKDGTY NWTSWFLVNI SDQRDDVVLT
	CQVKHDGQLA VSKRLALEVT VHQKDQSSDA TP
	Company without they. They location is at the discussion of the menufactures. If you have a
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.

Product Details	
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade
T	
Target Details	
Target:	SIRPG
Alternative Name:	SIRPG (SIRPG Products)

Probable immunoglobulin-like cell surface receptor. On binding with CD47, mediates cell-cell

Background:

Target Details	
	adhesion. Engagement on T-cells by CD47 on antigen-presenting cells results in enhanced antigen-specific T-cell proliferation and costimulates T-cell activation. {ECO:0000269 PubMed:15383453}.
Molecular Weight:	37.7 kDa Including tag.
UniProt:	Q9P1W8
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
