## Datasheet for ABIN3076990 SMAD6 Protein (AA 1-496) (Strep Tag)

#### Overview

Quantity:	1 mg
Target:	SMAD6
Protein Characteristics:	AA 1-496
Origin:	Human
Source:	Tobacco (Nicotiana tabacum)
Protein Type:	Recombinant
Purification tag / Conjugate:	This SMAD6 protein is labelled with Strep Tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA

## Product Details

#### Characteristics:

#### Key Benefits:

- Made in Germany from design to production by highly experienced protein experts.
- Protein expressed with ALICE® and purified by multi-step, protein-specific process to ensure correct folding and modification.
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

#### Expression System:

- ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
  protein production are removed, leaving only the protein production machinery and the
  mitochondria to drive the reaction. During our lysate completion steps, the additional
  components needed for protein production (amino acids, cofactors, etc.) are added to
  produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

#### Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:

Two step purification of proteins expressed in Almost Living Cell-Free Expression System (ALiCE®):

- 1. In a first purification step, the protein is purified from the cleared cell lysate using StrepTag capture material. Eluate fractions are analyzed by SDS-PAGE.
- 2. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and

# Target Details

Target:	SMAD6
Alternative Name:	SMAD6 (SMAD6 Products)
Background:	Mothers against decapentaplegic homolog 6 (MAD homolog 6) (Mothers against DPP homolog
	6) (SMAD family member 6) (SMAD 6) (Smad6) (hSMAD6),FUNCTION: Transforming growth
	factor-beta superfamily receptors signaling occurs through the Smad family of intracellular
	mediators. SMAD6 is an inhibitory Smad (i-Smad) that negatively regulates signaling
	downstream of type I transforming growth factor-beta (PubMed:9436979, PubMed:16951688,
	PubMed:22275001, PubMed:9759503, PubMed:10647776, PubMed:10708948,
	PubMed:10708949, PubMed:30848080). Acts as a mediator of TGF-beta and BMP anti-
	inflammatory activities. Suppresses IL1R-TLR signaling through its direct interaction with PEL1
	preventing NF-kappa-B activation, nuclear transport and NF-kappa-B-mediated expression of
	pro-inflammatory genes (PubMed:16951688). Blocks the BMP-SMAD1 signaling pathway by
	competing with SMAD4 for receptor-activated SMAD1-binding (PubMed:9436979,
	PubMed:30848080). Binds to regulatory elements in target promoter regions
	(PubMed:16491121). {ECO:0000269 PubMed:16491121, ECO:0000269 PubMed:16951688,

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a
