Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (ALiCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).

## Target Details

Target:	SOX10
Alternative Name:	SOX10 ( <a href="#">SOX10 Products</a> )
Background:	<p>Transcription factor SOX-10,FUNCTION: Transcription factor that plays a central role in developing and mature glia (By similarity). Specifically activates expression of myelin genes, during oligodendrocyte (OL) maturation, such as DUSP15 and MYRF, thereby playing a central role in oligodendrocyte maturation and CNS myelination (By similarity). Once induced, MYRF cooperates with SOX10 to implement the myelination program (By similarity). Transcriptional activator of MITF, acting synergistically with PAX3 (PubMed:21965087). Transcriptional activator of MBP, via binding to the gene promoter (By similarity).</p> <p>{ECO:0000250 UniProtKB:O55170, ECO:0000250 UniProtKB:Q04888, ECO:0000269 PubMed:21965087}.</p>
Molecular Weight:	49.9 kDa
UniProt:	<a href="#">P56693</a>
Pathways:	<a href="#">Chromatin Binding</a>

## Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
