antibodies

Datasheet for ABIN3079317 SLC1A7 Protein (AA 115-216) (His tag)

Overview

Quantity:	1 mg
Target:	SLC1A7
Protein Characteristics:	AA 115-216
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This SLC1A7 protein is labelled with His tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)
Product Details	
Sequence:	HPGSAAQKET TEQSGKPIMS SADALLDLIR NMFPANLVEA TFKQYRTKTT PVVKSPKVAP
	EEAPPRRILI YGVQEENGSH VQNFALDLTP PPEVVYKSEP GT
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	 special request, please contact us. Made in Germany - from design to production - by highly experienced protein experts.
Characteristics:	
Characteristics:	• Made in Germany - from design to production - by highly experienced protein experts.
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Human SLC1A7 Protein (raised in Insect Cells) purified by multi-step, protein-specific process
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Human SLC1A7 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Human SLC1A7 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis).
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Human SLC1A7 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis).

Product Details	
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	 In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.
	2. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade
Target Details	
Target:	SLC1A7
Alternative Name:	SLC1A7 (SLC1A7 Products)
Background:	Transports L-glutamate, the L-glutamate uptake is sodium- and voltage-dependent and

 chloride-independent. Its associated chloride conductance may participate in visual processing.

 Molecular Weight:
 12.1 kDa Including tag.

 UniProt:
 000341

Target Details	
Pathways:	Dicarboxylic Acid Transport
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
