

## Datasheet for ABIN3079380

# ELF1 Protein (AA 1-619) (Strep Tag)

### Overview

Quantity:	250 μg
Target:	ELF1
Protein Characteristics:	AA 1-619
Origin:	Human
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This ELF1 protein is labelled with Strep Tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS)

Brand:	AliCE®
Sequence:	MAAVVQQNDL VFEFASNVME DERQLGDPAI FPAVIVEHVP GADILNSYAG LACVEEPNDM
	ITESSLDVAE EEIIDDDDDD ITLTVEASCH DGDETIETIE AAEALLNMDS PGPMLDEKRI
	NNNIFSSPED DMVVAPVTHV SVTLDGIPEV METQQVQEKY ADSPGASSPE QPKRKKGRKT
	KPPRPDSPAT TPNISVKKKN KDGKGNTIYL WEFLLALLQD KATCPKYIKW TQREKGIFKL

	DEDPSSSIES SDPSLSSSAT SNRNQTSRSR VSSSPGVKGG ATTVLKPGNS KAAKPKDPVE
	VAQPSEVLRT VQPTQSPYPT QLFRTVHVVQ PVQAVPEGEA ARTSTMQDET LNSSVQSIRT
	IQAPTQVPVV VSPRNQQLHT VTLQTVPLTT VIASTDPSAG TGSQKFILQA IPSSQPMTVL
	KENVMLQSQK AGSPPSIVLG PAQVQQVLTS NVQTICNGTV SVASSPSFSA TAPVVTFSPR
	SSQLVAHPPG TVITSVIKTQ ETKTLTQEVE KKESEDHLKE NTEKTEQQPQ PYVMVVSSSN
	GFTSQVAMKQ NELLEPNSF

Sequence without tag. The proposed Strep-Tag is based on experience s with the expression system, a different complexity of the protein could make another tag necessary. In case you have a special request, please contact us.

#### Characteristics:

#### Key Benefits:

- · Made in Germany from design to production by highly experienced protein experts.
- · Protein expressed with ALiCE® and purified in one-step affinity chromatography
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

#### Expression System:

- ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
  protein production are removed, leaving only the protein production machinery and the
  mitochondria to drive the reaction. During our lysate completion steps, the additional
  components needed for protein production (amino acids, cofactors, etc.) are added to
  produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

#### Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- · The protein's absorbance will be measured against its specific reference buffer.
- · We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).

## **Product Details** Grade: custom-made **Target Details** Target: ELF1 Alternative Name ELF1 (ELF1 Products) Background: ETS-related transcription factor Elf-1 (E74-like factor 1), FUNCTION: Transcription factor that activates the LYN and BLK promoters. Appears to be required for the T-cell-receptor-mediated trans activation of HIV-2 gene expression. Binds specifically to two purine-rich motifs in the HIV-2 enhancer. {ECO:0000269|PubMed:8756667}. Molecular Weight: 67.5 kDa UniProt: P32519 **Application Details** In addition to the applications listed above we expect the protein to work for functional studies **Application Notes:** as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though. Comment: ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications. During lysate production, the cell wall and other cellular components that are not required for protein production are removed, leaving only the protein production machinery and the mitochondria to drive the reaction. During our lysate completion steps, the additional components needed for protein production (amino acids, cofactors, etc.) are added to produce something that functions like a cell, but without the constraints of a living system - all that's needed is the DNA that codes for the desired protein! Restrictions: For Research Use only Handling Format: Liquid Buffer: The buffer composition is at the discretion of the manufacturer. Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol Might differ depending on protein.

### Handling

Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
