Datasheet for ABIN3079789 FAM86C1 Protein (AA 1-165) (His tag)

Overview	
Quantity:	1 mg
Target:	FAM86C1
Protein Characteristics:	AA 1-165
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This FAM86C1 protein is labelled with His tag.
Application:	Crystallization (Crys), ELISA, SDS-PAGE (SDS), Western Blotting (WB)
Product Details	
Sequence:	MAPEENAGSE LLLQSFKRRF LAARALRSFR WQSLEAKLRD SSDSELLRDI LQKHEAVHTE
	PLDELYEVLV ETLMAKESTQ GHRSYLLTCC IAQKPSCRWS GSCGGWLPAG STSGLLNSTW
	PLPSATQRCA SCSPPSYAGL GSDGKRKLIM TRNCFPTEST WRWQS
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Human FAM86C1 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom

e proteins from other companies is that there is no financial obligation in case the protein
not be expressed or purified.
e unlikely event that the protein cannot be expressed or purified we do not charge anything
er companies might charge you for any performed steps in the expression process for
om-made proteins, e.g. fees might apply for the expression plasmid, the first expression
riments or purification optimization).
n you order this made-to-order protein you will only pay upon receival of the correctly
ed protein. With no financial risk on your end you can rest assured that our experienced
ein experts will do everything to make sure that you receive the protein you ordered.
concentration of our recombinant proteins is measured using the absorbance at 280nm.
protein's absorbance will be measured in several dilutions and is measured against its
ific reference buffer.
concentration of the protein is calculated using its specific absorption coefficient. We use
Expasy's protparam tool to determine the absorption coefficient of each protein.
step purification of proteins expressed in baculovirus infected SF9 insect cells:
a first purification step, the protein is purified from the cleared cell lysate using three fferent His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate actions are analyzed by SDS-PAGE.
otein containing fractions of the best purification are subjected to second purification step rough size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and estern blot.
% as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.

Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
