## Datasheet for ABIN3079858 FAM92B Protein (AA 1-304) (His tag)

Image

Overview

| Quantity:                     | 1 mg   |
|-------------------------------|--|
| Target:                       | FAM92B   |
| Protein Characteristics:      | AA 1-304   |
| Origin:                       | Human  |
| Source:                       | Insect Cells   |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This FAM92B protein is labelled with His tag.                        |
| Application:                  | ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS) |

## Product Details

| Sequence:        | MNIVFSRDSQ VRVMENTVAN TEKYFGQFCS LLAAYTRKTA RLRDKADQLV KQLIDFANSE<br>NPELRATMRG FAEDLAKVQD YRQAQVERLE TKVVNPLKLY GAQIKQTRAE IKKFKHVQNH<br>EIKQLEKLEK LRQKSPSDQQ MISQAETRVQ RAAVDSSRTT LQLEETVDGF QRQKLKDLQK<br>FFCDFVTIEM VFHAKAVEVY SSAFQTLEKY DLERDLLDFR AKMQGVYGHY DTRLLANTSP<br>PPSVLQSLAS QGTLQVQLSR ANEDPEHPHA NHGRFSLCEW VVKGQPAHCV CGQGGHLMLP<br>GHSL |
|------------------|---|
|                  | Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a special request, please contact us.  |
| Characteristics: | <ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Human FAM92B Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul>                               |

| Product Details   |   |
|-------------------|---|
|                   | This protein is a made to order protein and will be made for the first time for your order. Our   |
|                   | experts in the lab will ensure that you receive a correctly folded protein.   |
|                   | The big advantage of ordering our made-to-order proteins in comparison to ordering custom   |
|                   | made proteins from other companies is that there is no financial obligation in case the protein   |
|                   | cannot be expressed or purified.  |
|                   | In the unlikely event that the protein cannot be expressed or purified we do not charge anything  |
|                   | (other companies might charge you for any performed steps in the expression process for   |
|                   | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression  |
|                   | experiments or purification optimization).  |
|                   | When you order this made-to-order protein you will only pay upon receival of the correctly  |
|                   | folded protein. With no financial risk on your end you can rest assured that our experienced  |
|                   | protein experts will do everything to make sure that you receive the protein you ordered.   |
|                   | The concentration of our recombinant proteins is measured using the absorbance at 280nm.  |
|                   | The protein's absorbance will be measured in several dilutions and is measured against its  |
|                   | specific reference buffer.  |
|                   | The concentration of the protein is calculated using its specific absorption coefficient. We use  |
|                   | the Expasy's protparam tool to determine the absorption coefficient of each protein.  |
| Purification:     | Two step purification of proteins expressed in baculovirus infected SF9 insect cells:   |
|                   | 1. In a first purification step, the protein is purified from the cleared cell lysate using three   |
|                   | different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate   |
|                   | fractions are analyzed by SDS-PAGE.<br>2. Protein containing fractions of the best purification are subjected to second purification step |
|                   | through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and  |
|                   | Western blot.   |
|                   |   |
| Purity:           | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.  |
| Sterility:        | 0.22 µm filtered  |
| Endotoxin Level:  | Protein is endotoxin free.  |
| Grade:            | Crystallography grade   |
|                   |   |
| Target Details    |   |
| Target:           | FAM92B  |
| Alternative Name: | FAM92B (FAM92B Products)  |
|                   |   |

35.7 kDa Including tag.

Molecular Weight:

| Target Details      |  |
|---------------------|--|
| UniProt:            | Q6ZTR7   |
| Application Details |  |
| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies<br>as well. As the protein has not been tested for functional studies yet we cannot offer a<br>guarantee though.   |
| Comment:            | In cases in which it is highly likely that the recombinant protein with the default tag will be<br>insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to<br>increase solubility. We will discuss all possible options with you in detail to assure that you<br>receive your protein of interest. |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Format:             | Liquid   |
| Buffer:             | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.   |
| Handling Advice:    | Avoid repeated freeze-thaw cycles.   |
| Storage:            | -80 °C   |
| Storage Comment:    | Store at -80°C.  |
| Expiry Date:        | Unlimited (if stored properly)   |
