

# Datasheet for ABIN3080478 GATA3 Protein (AA 1-443) (Strep Tag)

Overview

Quantity:	250 µg
Target:	GATA3
Protein Characteristics:	AA 1-443
Origin:	Human
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This GATA3 protein is labelled with Strep Tag.
Application:	Western Blotting (WB), ELISA, SDS-PAGE (SDS)

# Product Details

Brand:	AliCE®
Sequence:	MEVTADQPRW VSHHHPAVLN GQHPDTHHPG LSHSYMDAAQ YPLPEEVDVL FNIDGQGNHV
	PPYYGNSVRA TVQRYPPTHH GSQVCRPPLL HGSLPWLDGG KALGSHHTAS PWNLSPFSKT
	SIHHGSPGPL SVYPPASSSS LSGGHASPHL FTFPPTPPKD VSPDPSLSTP GSAGSARQDE
	KECLKYQVPL PDSMKLESSH SRGSMTALGG ASSSTHHPIT TYPPYVPEYS SGLFPPSSLL
	GGSPTGFGCK SRPKARSSTG RECVNCGATS TPLWRRDGTG HYLCNACGLY HKMNGQNRPL
	IKPKRRLSAA RRAGTSCANC QTTTTTLWRR NANGDPVCNA CGLYYKLHNI NRPLTMKKEG
	IQTRNRKMSS KSKKCKKVHD SLEDFPKNSS FNPAALSRHM SSLSHISPFS HSSHMLTTPT
	PMHPPSSLSF GPHHPSSMVT AMG
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression
	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.

## Product Details

### Characteristics:

#### Key Benefits:

- Made in Germany from design to production by highly experienced protein experts.
- Protein expressed with ALiCE® and purified in one-step affinity chromatography
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

### Expression System:

- ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
  protein production are removed, leaving only the protein production machinery and the
  mitochondria to drive the reaction. During our lysate completion steps, the additional
  components needed for protein production (amino acids, cofactors, etc.) are added to
  produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

### Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).
Grade:	custom-made

# Target Details

Target:	GATA3	
Alternative Name:	GATA3 (GATA3 Products)	
Background:	Trans-acting T-cell-specific transcription factor GATA-3 (GATA-binding factor 3),FUNCTION: Transcriptional activator which binds to the enhancer of the T-cell receptor alpha and delta genes. Binds to the consensus sequence 5'-AGATAG-3'. Required for the T-helper 2 (Th2) differentiation process following immune and inflammatory responses. Positively regulates ASB2 expression (By similarity). Coordinates macrophage transcriptional activation and UCP2- dependent metabolic reprogramming in response to IL33. Upon tissue injury, acts downstream of IL33 signaling to drive differentiation of inflammation-resolving alternatively activated macrophages. {EC0:0000250 UniProtKB:P23772, EC0:0000269 PubMed:23824597}.	
Molecular Weight:	47.9 kDa	
UniProt:	P23771	
Pathways:	Hormone Transport, Regulation of Hormone Metabolic Process, Tube Formation	
Application Details		
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.	
Comment:	<ul> <li>ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications.</li> <li>During lysate production, the cell wall and other cellular components that are not required for protein production are removed, leaving only the protein production machinery and the mitochondria to drive the reaction. Buffer:	The buffer composition is at the discretion of the manufacturer. Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol <b>Might differ depending on protein.</b>
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
