

Datasheet for ABIN3080557 GAN Protein (AA 1-597) (Strep Tag)

Overview

Quantity:	250 μg
Target:	GAN
Protein Characteristics:	AA 1-597
Origin:	Human
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This GAN protein is labelled with Strep Tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA

Product Details

Brand:	AliCE®
Sequence:	MAEGSAVSDP QHAARLLRAL SSFREESRFC DAHLVLDGEE IPVQKNILAA ASPYIRTKLN
	YNPPKDDGST YKIELEGISV MVMREILDYI FSGQIRLNED TIQDVVQAAD LLLLTDLKTL
	CCEFLEGCIA AENCIGIRDF ALHYCLHHVH YLATEYLETH FRDVSSTEEF LELSPQKLKE
	VISLEKLNVG NERYVFEAVI RWIAHDTEIR KVHMKDVMSA LWVSGLDSSY LREQMLNEPL
	VREIVKECSN IPLSQPQQGE AMLANFKPRG YSECIVTVGG EERVSRKPTA AMRCMCPLYD
	PNRQLWIELA PLSMPRINHG VLSAEGFLFV FGGQDENKQT LSSGEKYDPD ANTWTALPPM
	NEARHNFGIV EIDGMLYILG GEDGEKELIS MECYDIYSKT WTKQPDLTMV RKIGCYAAMK
	KKIYAMGGGS YGKLFESVEC YDPRTQQWTA ICPLKERRFG AVACGVAMEL YVFGGVRSRE
	DAQGSEMVTC KSEFYHDEFK RWIYLNDQNL CIPASSSFVY GAVPIGASIY VIGDLDTGTN
	YDYVREFKRS TGTWHHTKPL LPSDLRRTGC AALRIANCKL FRLQLQQGLF RIRVHSP
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression

	system, a different complexity of the protein could make another tag necessary. In case yo
	have a special request, please contact us.
Characteristics:	Key Benefits:
	 Made in Germany - from design to production - by highly experienced protein experts. Protein expressed with ALICE® and purified in one-step affinity chromatography These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed). State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made-to-order protein and will be made for the first time for your order. Our
	experts in the lab try to ensure that you receive soluble protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	Expression System:
	 ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications. During lysate production, the cell wall and other cellular components that are not required fo protein production are removed, leaving only the protein production machinery and the mitochondria to drive the reaction. During our lysate completion steps, the additional components needed for protein production (amino acids, cofactors, etc.) are added to produce something that functions like a cell, but without the constraints of a living system - all that's needed is the DNA that codes for the desired protein!
	Concentration:
	 The concentration of our recombinant proteins is measured using the absorbance at 280nm The protein's absorbance will be measured against its specific reference buffer. We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.
Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).

Grade:

custom-made

Target Details

Target:	GAN
Alternative Name:	GAN (GAN Products)
Background:	Gigaxonin (Kelch-like protein 16),FUNCTION: Probable cytoskeletal component that directly or indirectly plays an important role in neurofilament architecture. May act as a substrate-specific adapter of an E3 ubiquitin-protein ligase complex which mediates the ubiquitination and subsequent proteasomal degradation of target proteins. Controls degradation of TBCB. Controls degradation of MAP1B and MAP1S, and is critical for neuronal maintenance and survival. {ECO:0000269 PubMed:12147674, ECO:0000269 PubMed:15983046, ECO:0000269 PubMed:16227972, ECO:0000269 PubMed:16303566}.
Molecular Weight:	67.6 kDa
UniProt:	Q9H2C0
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Comment:	ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications. During lysate production, the cell wall and other cellular components that are not required for
	protein production, the cell wall and other cellular components that are not required for protein production are removed, leaving only the protein production machinery and the mitochondria to drive the reaction. During our lysate completion steps, the additional components needed for protein production (amino acids, cofactors, etc.) are added to produce something that functions like a cell, but without the constraints of a living system - all that's needed is the DNA that codes for the desired protein!
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer. Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol Might differ depending on protein.

Handling

Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
