()	V	0	rv	1	е.	W

Ougatity:			
Quantity:	1 mg		
Target:	GNG10		
Protein Characteristics:	AA 2-65		
Origin:	Human		
Source:	Escherichia coli (E. coli)		
Protein Type:	Recombinant		
Purification tag / Conjugate:	This GNG10 protein is labelled with His tag.		
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)		
Product Details			
Caguanas			
Sequence:	SSGASASALQ RLVEQLKLEA GVERIKVSQA AAELQQYCMQ NACKDALLVG VPAGSNPFRE PRSC		
Sequence:	SSGASASALQ RLVEQLKLEA GVERIKVSQA AAELQQYCMQ NACKDALLVG VPAGSNPFRE PRSC Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a		
sequence.			
Sequence: Characteristics:	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a		

	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in bacterial culture:
	 In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.
	 Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 μm filtered
Endotoxin Level:	Endotoxin has not been removed. Please contact us if you require endotoxin removal.
Grade:	Crystallography grade
Target Details	
Target:	GNG10
Alternative Name:	GNG10 (GNG10 Products)
Background:	Guanine nucleotide-binding proteins (G proteins) are involved as a modulator or transducer in
	various transmembrane signaling systems. The beta and gamma chains are required for the
	GTPase activity, for replacement of GDP by GTP, and for G protein-effector interaction.
	Interacts with beta-1 and beta-2, but not with beta-3.
Molecular Weight:	7.7 kDa Including tag.
UniProt:	P50151

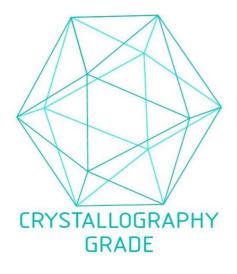

Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C

Images

Expiry Date:

Storage Comment:

Store at -80°C.

Unlimited (if stored properly)
