## Datasheet for ABIN3080899 GNS Protein (AA 37-552) (His tag)

Image

## Overview

Quantity:	1 mg
Target:	GNS
Protein Characteristics:	AA 37-552
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This GNS protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS), Crystallization (Crys)

This protein is a made to order protein and will be made for the first time for your orde	
experts in the lab will ensure that you receive a correctly folded protein.	
The big advantage of ordering our made-to-order proteins in comparison to ordering c	ustom
made proteins from other companies is that there is no financial obligation in case the cannot be expressed or purified.	? protein
In the unlikely event that the protein cannot be expressed or purified we do not charge	anything
(other companies might charge you for any performed steps in the expression proces	, ,
custom-made proteins, e.g. fees might apply for the expression plasmid, the first expre	
experiments or purification optimization).	
When you order this made-to-order protein you will only pay upon receival of the corre	ctly
folded protein. With no financial risk on your end you can rest assured that our experie	enced
protein experts will do everything to make sure that you receive the protein you ordere	d.
The concentration of our recombinant proteins is measured using the absorbance at 2	280nm.
The protein's absorbance will be measured in several dilutions and is measured agains specific reference buffer.	st its
The concentration of the protein is calculated using its specific absorption coefficient.	We use
the Expasy's protparam tool to determine the absorption coefficient of each protein.	
Purification: Two step purification of proteins expressed in baculovirus infected SF9 insect cells:	
<ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using th different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Elua fractions are analyzed by SDS-PAGE.</li> </ol>	
<ol> <li>Protein containing fractions of the best purification are subjected to second purification through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE Western blot.</li> </ol>	•
Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot	
Sterility: 0.22 µm filtered	
Endotoxin Level: Protein is endotoxin free.	
Grade: Crystallography grade

Target Details	
Target:	GNS
Alternative Name:	GNS (GNS Products)
Molecular Weight:	59.3 kDa Including tag.
UniProt:	P15586
Pathways:	Glycosaminoglycan Metabolic Process
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C

Storage Comment:

Expiry Date:

Store at -80°C.

Unlimited (if stored properly)
