antibodies

# Datasheet for ABIN3081594 IL17RD Protein (AA 321-739) (His tag)

I Image

Overview

Quantity:	1 mg
Target:	IL17RD
Protein Characteristics:	AA 321-739
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This IL17RD protein is labelled with His tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)

### Product Details

Sequence:	CRKKQQENIY SHLDEESSES STYTAALPRE RLRPRPKVFL CYSSKDGQNH MNVVQCFAYF
	LQDFCGCEVA LDLWEDFSLC REGQREWVIQ KIHESQFIIV VCSKGMKYFV DKKNYKHKGG
	GRGSGKGELF LVAVSAIAEK LRQAKQSSSA ALSKFIAVYF DYSCEGDVPG ILDLSTKYRL
	MDNLPQLCSH LHSRDHGLQE PGQHTRQGSR RNYFRSKSGR SLYVAICNMH QFIDEEPDWF
	EKQFVPFHPP PLRYREPVLE KFDSGLVLND VMCKPGPESD FCLKVEAAVL GATGPADSQH
	ESQHGGLDQD GEARPALDGS AALQPLLHTV KAGSPSDMPR DSGIYDSSVP SSELSLPLME
	GLSTDQTETS SLTESVSSSS GLGEEEPPAL PSKLLSSGSC KADLGCRSYT DELHAVAPL
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.
	Human IL17RD Protein (raised in Insect Cells) purified by multi-step, protein-specific process
	to ensure crystallization grade.

	State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.
	2. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade
Target Details	
Target:	IL17RD
Alternative Name:	IL17RD (IL17RD Products)
Alternative Nattle.

## Target Details

Background:	Feedback inhibitor of fibroblast growth factor mediated Ras-MAPK signaling and ERK
	activation. May inhibit FGF-induced FGFR1 tyrosine phosphorylation. Regulates the nuclear ERK
	signaling pathway by spatially blocking nuclear translocation of activated ERK without inhibiting
	cytoplasmic phosphorylation of ERK. Mediates JNK activation and may be involved in
	apoptosis. Might have a role in the early stages of fate specification of GnRH-secreting neurons
	(By similarity). {ECO:0000250, ECO:0000269 PubMed:12807873,
	ECO:0000269 PubMed:12958313, ECO:0000269 PubMed:15239952}.
Molecular Weight:	47.4 kDa Including tag.
UniProt:	Q8NFM7
Pathways:	Toll-Like Receptors Cascades

## Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only

### Handling

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
