

Datasheet for ABIN3081821 IFT57 Protein (AA 1-429) (Strep Tag)

Overview

Quantity:	1 mg
Target:	IFT57
Protein Characteristics:	AA 1-429
Origin:	Human
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This IFT57 protein is labelled with Strep Tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS)

Product Details

Brand:	AliCE®
Sequence:	MTAALAVVTT SGLEDGVPRS RGEGTGEVVL ERGPGAAYHM FVVMEDLVEK LKLLRYEEEF
	LRKSNLKAPS RHYFALPTNP GEQFYMFCTL AAWLINKAGR PFEQPQEYDD PNATISNILS
	ELRSFGRTAD FPPSKLKSGY GEHVCYVLDC FAEEALKYIG FTWKRPIYPV EELEEESVAE
	DDAELTLNKV DEEFVEEETD NEENFIDLNV LKAQTYHLDM NETAKQEDIL ESTTDAAEWS
	LEVERVLPQL KVTIRTDNKD WRIHVDQMHQ HRSGIESALK ETKGFLDKLH NEITRTLEKI
	SSREKYINNQ LENLVQEYRA AQAQLSEAKE RYQQGNGGVT ERTRLLSEVM EELEKVKQEM
	EEKGSSMTDG APLVKIKQSL TKLKQETVEM DIRIGIVEHT LLQSKLKEKS NMTRNMHATV
	IPEPATGFY
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression
	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.

Product Details

Characteristics:

Key Benefits:

- Made in Germany from design to production by highly experienced protein experts.
- Protein expressed with ALiCE® and purified in one-step affinity chromatography
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Expression System:

- ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
 protein production are removed, leaving only the protein production machinery and the
 mitochondria to drive the reaction. During our lysate completion steps, the additional
 components needed for protein production (amino acids, cofactors, etc.) are added to
 produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).
Grade:	custom-made

Target	Details
- 3	

Target:	IFT57
Alternative Name:	IFT57 (IFT57 Products)
Background:	Intraflagellar transport protein 57 homolog (Dermal papilla-derived protein 8) (Estrogen-related
	receptor beta-like protein 1) (HIP1-interacting protein) (MHS4R2),FUNCTION: Required for the
	formation of cilia. Plays an indirect role in sonic hedgehog signaling, cilia being required for all
	activity of the hedgehog pathway (By similarity). Has pro-apoptotic function via its interaction
	with HIP1, leading to recruit caspase-8 (CASP8) and trigger apoptosis. Has the ability to bind
	DNA sequence motif 5'-AAAGACATG-3' present in the promoter of caspase genes such as
	CASP1, CASP8 and CASP10, suggesting that it may act as a transcription regulator, however
	the relevance of such function remains unclear. {ECO:0000250,
	ECO:0000269 PubMed:11788820, ECO:0000269 PubMed:17107665,
	ECO:0000269 PubMed:17623017}.
Molecular Weight:	49.1 kDa
UniProt:	Q9NWB7
Pathways:	Hedgehog Signaling, Positive Regulation of Endopeptidase Activity
Application Dataila	
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a
	guarantee though.
Comment:	$\operatorname{ALiCE}^{\operatorname{ extsf{B}}}$, our Almost Living Cell-Free Expression System is based on a lysate obtained from
	Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce
	even the most difficult-to-express proteins, including those that require post-translational
	modifications.
	During lysate production, the cell wall and other cellular components that are not required for
	protein production are removed, leaving only the protein production machinery and the
	mitochondria to drive the reaction. During our lysate completion steps, the additional
	components needed for protein production (amino acids, cofactors, etc.) are added to produce
	something that functions like a cell, but without the constraints of a living system - all that's
	needed is the DNA that codes for the desired protein!
Restrictions:	For Research Use only

Handling

Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer. Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol Might differ depending on protein.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
