antibodies

## Datasheet for ABIN3082075 IL1R2 Protein (AA 14-343) (His tag)

| Overview                      |  |
|-------------------------------|--|
| Quantity:                     | 1 mg   |
| Target:                       | IL1R2  |
| Protein Characteristics:      | AA 14-343  |
| Origin:                       | Human  |
| Source:                       | Insect Cells   |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This IL1R2 protein is labelled with His tag.   |
| Application:                  | SDS-PAGE (SDS), Western Blotting (WB), ELISA, Crystallization (Crys)   |
| Product Details               |  |
| Sequence:                     | FTLQPAAHTG AARSCRFRGR HYKREFRLEG EPVALRCPQV PYWLWASVSP RINLTWHKND  |
|                               | SARTVPGEEE TRMWAQDGAL WLLPALQEDS GTYVCTTRNA SYCDKMSIEL RVFENTDAFL  |
|                               | PFISYPQILT LSTSGVLVCP DLSEFTRDKT DVKIQWYKDS LLLDKDNEKF LSVRGTTHLL  |
|                               | VHDVALEDAG YYRCVLTFAH EGQQYNITRS IELRIKKKKE ETIPVIISPL KTISASLGSR LTIPCKVFLG   |
|                               | TGTPLTTMLW WTANDTHIES AYPGGRVTEG PRQEYSENNE NYIEVPLIFD PVTREDLHMD  |
|                               | FKCVVHNTLS FQTLRTTVKE  |
|                               | Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a   |
|                               | special request, please contact us.  |
| Characteristics:              | <ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Human IL1R2 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.</li> </ul> |
|                               | State-of-the-art algorithm used for plasmid design (Gene synthesis).   |

| Product Details     |   |
|---------------------|---|
|                     | This protein is a made to order protein and will be made for the first time for your order. Our   |
|                     | experts in the lab will ensure that you receive a correctly folded protein.   |
|                     | The big advantage of ordering our made-to-order proteins in comparison to ordering custom   |
|                     | made proteins from other companies is that there is no financial obligation in case the protein   |
|                     | cannot be expressed or purified.  |
|                     | In the unlikely event that the protein cannot be expressed or purified we do not charge anything  |
|                     | (other companies might charge you for any performed steps in the expression process for   |
|                     | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression  |
|                     | experiments or purification optimization).  |
|                     | When you order this made-to-order protein you will only pay upon receival of the correctly  |
|                     | folded protein. With no financial risk on your end you can rest assured that our experienced  |
|                     | protein experts will do everything to make sure that you receive the protein you ordered.   |
|                     | The concentration of our recombinant proteins is measured using the absorbance at 280nm.  |
|                     | The protein's absorbance will be measured in several dilutions and is measured against its  |
|                     | specific reference buffer.  |
|                     | The concentration of the protein is calculated using its specific absorption coefficient. We use  |
|                     | the Expasy's protparam tool to determine the absorption coefficient of each protein.  |
| Purification:       | Two step purification of proteins expressed in baculovirus infected SF9 insect cells:   |
|                     | 1. In a first purification step, the protein is purified from the cleared cell lysate using three   |
|                     | different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate   |
|                     | fractions are analyzed by SDS-PAGE.<br>2. Protein containing fractions of the best purification are subjected to second purification step |
|                     | through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and  |
|                     | Western blot.   |
| Purity:             | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.  |
| Sterility:          | 0.22 µm filtered  |
| Endotoxin Level:    | Protein is endotoxin free.  |
| Grade:              | Crystallography grade   |
| <b>T</b> . <b>D</b> |   |
| Target Details      |   |
| Target:             | IL1R2   |
| Alternative Name:   | IL1R2 (IL1R2 Products)  |
| Background:         | Non-signaling receptor for IL1A, IL1B and IL1RN. Reduces IL1B activities. Serves as a decoy   |

## Target Details

|                     | receptor by competetive binding to IL1B and preventing its binding to IL1R1. Also modulates       |
|---------------------|---|
|                     | cellular response through non-signaling association with IL1RAP after binding to IL1B. IL1R2      |
|                     | (membrane and secreted forms) preferentially binds IL1B and poorly IL1A and IL1RN. The            |
|                     | secreted IL1R2 recruits secreted IL1RAP with high affinity, this complex formation may be the     |
|                     | dominant mechanism for neutralization of IL1B by secreted/soluble receptors.                      |
|                     | {ECO:0000269 PubMed:10975853, ECO:0000269 PubMed:12530978,  |
|                     | ECO:0000269 PubMed:7989776, ECO:0000269 PubMed:9862719}.  |
| Molecular Weight:   | 38.7 kDa Including tag.   |
| UniProt:            | P27930  |
| Pathways:           | NF-kappaB Signaling   |
| Application Details |   |
| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies |
|                     | as well. As the protein has not been tested for functional studies yet we cannot offer a          |
|                     | guarantee though.   |
| Comment:            | In cases in which it is highly likely that the recombinant protein with the default tag will be   |
|                     | insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to     |
|                     | increase solubility. We will discuss all possible options with you in detail to assure that you   |
|                     | receive your protein of interest.   |
| Restrictions:       | For Research Use only   |
| Handling            |   |
| Format:             | Liquid  |
| Buffer:             | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.        |
| Handling Advice:    | Avoid repeated freeze-thaw cycles.  |
| Storage:            | -80 °C  |
| Storage Comment:    | Store at -80°C.   |
|                     |   |

Expiry Date: Unlimited (if stored properly)
