

Datasheet for ABIN3082101 IMP3 Protein (AA 1-184) (Strep Tag)

Overview Quantity: 1 mg IMP3 Target: Protein Characteristics: AA 1-184 Origin: Human Source: Tobacco (Nicotiana tabacum) Protein Type: Recombinant Purification tag / Conjugate: This IMP3 protein is labelled with Strep Tag. Application: ELISA, SDS-PAGE (SDS), Western Blotting (WB)

Product Details

| Sequence: | MVRKLKFHEQ KLLKQVDFLN WEVTDHNLHE LRVLRRYRLQ RREDYTRYNQ LSRAVRELAR |
|------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | RLRDLPERDQ FRVRASAALL DKLYALGLVP TRGSLELCDF VTASSFCRRR LPTVLLKLRM |
| | AQHLQAAVAF VEQGHVRVGP DVVTDPAFLV TRSMEDFVTW VDSSKIKRHV LEYNEERDDF DLEA |
| | Sequence without tag. The proposed Strep-Tag is based on experience s with the expression |
| | system, a different complexity of the protein could make another tag necessary. In case you |
| | have a special request, please contact us. |
| Characteristics: | Key Benefits: |
| | Made in Germany - from design to production - by highly experienced protein experts. |
| | Protein expressed with ALiCE® and purified in one-step affinity chromatography |
| | |
| | These proteins are normally active (enzymatically functional) as our customers have |
| | These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed). |

All rights reserved. This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Expression System:

- ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
 protein production are removed, leaving only the protein production machinery and the
 mitochondria to drive the reaction. During our lysate completion steps, the additional
 components needed for protein production (amino acids, cofactors, etc.) are added to
 produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

| Purification: | One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression |
|---------------|---------------------------------------------------------------------------------------------|
| | System (AliCE®). |
| Purity: | > 80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC). |

Target Details

| Target: | IMP3 |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Alternative Name: | IMP3 (IMP3 Products) |
| Background: | U3 small nucleolar ribonucleoprotein protein IMP3 (U3 snoRNP protein IMP3) (BRMS2),FUNCTION: Component of the 60-80S U3 small nucleolar ribonucleoprotein (U3 |
| | snoRNP). Required for the early cleavages during pre-18S ribosomal RNA processing |
| | (PubMed:12655004). Part of the small subunit (SSU) processome, first precursor of the small |

Target Details

| | eukaryotic ribosomal subunit. During the assembly of the SSU processome in the nucleolus, |
|---------------------|---------------------------------------------------------------------------------------------------|
| | many ribosome biogenesis factors, an RNA chaperone and ribosomal proteins associate with |
| | the nascent pre-rRNA and work in concert to generate RNA folding, modifications, |
| | rearrangements and cleavage as well as targeted degradation of pre-ribosomal RNA by the |
| | RNA exosome (PubMed:34516797). {ECO:0000269 PubMed:12655004, |
| | EC0:0000269 PubMed:34516797}. |
| Molecular Weight: | 21.9 kDa |
| UniProt: | Q9NV31 |
| Application Details | |
| Application Notes: | In addition to the applications listed above we expect the protein to work for functional studies |
| | as well. As the protein has not been tested for functional studies yet we cannot offer a |
| | guarantee though. |
| Comment: | ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from |
| | Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce |
| | even the most difficult-to-express proteins, including those that require post-translational |
| | modifications. |
| | During lysate production, the cell wall and other cellular components that are not required for |
| | protein production are removed, leaving only the protein production machinery and the |
| | mitochondria to drive the reaction. During our lysate completion steps, the additional |
| | components needed for protein production (amino acids, cofactors, etc.) are added to produce |
| | something that functions like a cell, but without the constraints of a living system - all that's |
| | needed is the DNA that codes for the desired protein! |
| Restrictions: | For Research Use only |
| Handling | |

| Format: | Liquid |
|------------------|--------------------------------------------------------------------------------------------------------------------|
| Buffer: | The buffer composition is at the discretion of the manufacturer. If you have a special request, please contact us. |
| Handling Advice: | Avoid repeated freeze-thaw cycles. |
| Storage: | -80 °C |
| Storage Comment: | Store at -80°C. |
