Datasheet for ABIN308216  
**anti-Nitrotyrosine antibody**

1 Image

### Overview

Quantity:	100 µg
Target:	Nitrotyrosine
Reactivity:	Please inquire
Host:	Mouse
Clonality:	Monoclonal
Conjugate:	This Nitrotyrosine antibody is un-conjugated
Application:	Western Blotting (WB), ELISA, Immunoprecipitation (IP)

### Product Details

Immunogen:	ELISA,WB,IP
Clone:	6B2
Isotype:	IgG1
Specificity:	For research use only.
Purification:	Purified IgG by Affinity chromatography on Protein A

### Target Details

Target:	Nitrotyrosine
Alternative Name:	Nitro Tyrosine ( <a href="#">Nitrotyrosine Products</a> )
Target Type:	Chemical
Background:	Tyrosine nitration is a posttranslational modification generated by a nitrogen free radical

## Target Details

(peroxynitrite ONOO<sup>-</sup>). This reactive nitrogen specie reacts with macromolecules of the organism (amino acid, protein?) and leads to functional alterations which can either participate to adaptation or lead to cell death during cell-stress conditions

## Application Details

Application Notes: Recommended concentrations: indirect ELISA: 2 to 100ng/ml; IP: 1 µg/ml; western blot: 0.1 µg/ml. Optimal dilutions/concentrations should be determined by the end user.

Comment: For research use only.

Restrictions: For Research Use only

## Handling

Format: Liquid

Concentration: 1 mg/ml

Buffer: Phosphate Buffered Saline 10 mM – NaCl 0,15 M – pH 7,4. Thiomrosol 0,01 % is used as preservative.

Storage: -20 °C
