Datasheet for ABIN3082270 MYST1 Protein (AA 2-458) (His tag)

1 Image

Overview

Quantity:	1 mg
Target:	MYST1 (KAT8)
Protein Characteristics:	AA 2-458
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This MYST1 protein is labelled with His tag.
Application:	Western Blotting (WB), ELISA, Crystallization (Crys), SDS-PAGE (SDS)

Product Details

Target Details	
Grade:	Crystallography grade
Endotoxin Level:	Protein is endotoxin free.
Sterility:	0.22 µm filtered
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
	 In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	The concentration of the protein is calculated using its specific absorption coefficient. We use the Expasy's protparam tool to determine the absorption coefficient of each protein.
	specific reference buffer.
	The protein's absorbance will be measured in several dilutions and is measured against its
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.

Target Details

Background:	Histone acetyltransferase which may be involved in transcriptional activation. May influence the
	function of ATM. As part of the MSL complex it is involved in acetylation of nucleosomal
	histone H4 producing specifically H4K16ac. As part of the NSL complex it may be involved in
	acetylation of nucleosomal histone H4 on several lysine residues. That activity is less specific
	than the one of the MSL complex. Can also acetylate TP53/p53 at 'Lys-120'.

	EC0:0000269 PubMed:20018852, EC0:0000269 PubMed:21217699,
	EC0:0000269 PubMed:22020126, EC0:0000269 PubMed:22547026}.
Molecular Weight:	53.2 kDa Including tag.
UniProt:	Q9H7Z6
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a
	guarantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be
	insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to
	increase solubility. We will discuss all possible options with you in detail to assure that you
	receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Llandling Adviso:	Avoid repeated fracts them evalue

Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
