antibodies

Datasheet for ABIN3082638 KIR3DL3 Protein (AA 26-322) (His tag)

Overview

Quantity:	1 mg
Target:	KIR3DL3
Protein Characteristics:	AA 26-322
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This KIR3DL3 protein is labelled with His tag.
Application:	SDS-PAGE (SDS), Western Blotting (WB), ELISA, Crystallization (Crys)

Product Details

Sequence:	QDKPFLSAWP GTVVSEGQHV TLQCRSRLGF NEFSLSKEDG MPVPELYNRI FRNSFLMGPV
	TPAHAGTYRC CSSHPHSPTG WSAPSNPVVI MVTGVHRKPS LLAHPGPLVK SGETVILQCW
	SDVRFERFLL HREGITEDPL RLVGQLHDAG SQVNYSMGPM TPALAGTYRC FGSVTHLPYE
	LSAPSDPLDI VVVGLYGKPS LSAQPGPTVQ AGENVTLSCS SRSLFDIYHL SREAEAGELR
	LTAVLRVNGT FQANFPLGPV THGGNYRCFG SFRALPHAWS DPSDPLPVSV TGNSRHL
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	 special request, please contact us. Made in Germany - from design to production - by highly experienced protein experts.
Characteristics:	
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Human KIR3DL3 Protein (raised in Insect Cells) purified by multi-step, protein-specific

experts in the lab will ensure that you receive a correctly folded protein.
The big advantage of ordering our made-to-order proteins in comparison to ordering custom
made proteins from other companies is that there is no financial obligation in case the protein
cannot be expressed or purified.
In the unlikely event that the protein cannot be expressed or purified we do not charge anything
(other companies might charge you for any performed steps in the expression process for
custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
experiments or purification optimization).
When you order this made-to-order protein you will only pay upon receival of the correctly
folded protein. With no financial risk on your end you can rest assured that our experienced
protein experts will do everything to make sure that you receive the protein you ordered.
The concentration of our recombinant proteins is measured using the absorbance at 280nm.
The protein's absorbance will be measured in several dilutions and is measured against its
specific reference buffer.
The concentration of the protein is calculated using its specific absorption coefficient. We use
the Expasy's protparam tool to determine the absorption coefficient of each protein.
Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
1. In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step
through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
Western blot.
>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
0.22 µm filtered
Protein is endotoxin free.
Crystallography grade

Target Details

Target:	KIR3DL3
Alternative Name:	KIR3DL3 (KIR3DL3 Products)
Background:	Receptor on natural killer cells. May inhibit the activity of NK cells thus preventing cell lysis. {ECO:0000303 PubMed:11513144}.

Target Details		
Molecular Weight:	33.2 kDa Including tag.	
UniProt:	Q8N743	
Application Details		
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.	
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.	
Restrictions:	For Research Use only	
Handling		
Format:	Liquid	
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.	
Handling Advice:	Avoid repeated freeze-thaw cycles.	
Storage:	-80 °C	
Storage Comment:	Store at -80°C.	
Expiry Date:	Unlimited (if stored properly)
