Datasheet for ABIN3083072 LILRB1 Protein (AA 483-650) (His tag)

Overview

Quantity:	1 mg
Target:	LILRB1
Protein Characteristics:	AA 483-650
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This LILRB1 protein is labelled with His tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)

Product Details

Sequence:	LRHRRQGKHW TSTQRKADFQ HPAGAVGPEP TDRGLQWRSS PAADAQEENL YAAVKHTQPE
	DGVEMDTRSP HDEDPQAVTY AEVKHSRPRR EMASPPSPLS GEFLDTKDRQ AEEDRQMDTE
	AAASEAPQDV TYAQLHSLTL RREATEPPPS QEGPSPAVPS IYATLAIH
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Human LILRB1 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom

	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE.
	Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade
Target Details	
Farget:	LILRB1
Alternative Name:	LILRB1 (LILRB1 Products)
Background:	Receptor for class I MHC antigens. Recognizes a broad spectrum of HLA-A, HLA-B, HLA-C and
	HLA-G alleles. Receptor for H301/UL18, a human cytomegalovirus class I MHC homolog.
	Ligand binding results in inhibitory signals and down-regulation of the immune response.
	Engagement of LILRB1 present on natural killer cells or T-cells by class I MHC molecules

Target Details

-	
	protects the target cells from lysis. Interaction with HLA-B or HLA-E leads to inhibition of the
	signal triggered by FCER1A and inhibits serotonin release. Inhibits FCGR1A-mediated
	phosphorylation of cellular proteins and mobilization of intracellular calcium ions.
	{ECO:0000269 PubMed:11907092, ECO:0000269 PubMed:9285411,
	ECO:0000269 PubMed:9842885}.
Molecular Weight:	19.6 kDa Including tag.
JniProt:	Q8NHL6
Pathways:	Cellular Response to Molecule of Bacterial Origin, Regulation of Leukocyte Mediated Immunity
	Positive Regulation of Immune Effector Process, Production of Molecular Mediator of Immune
	Response
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a
	guarantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be
	insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to
	increase solubility. We will discuss all possible options with you in detail to assure that you
	receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
