antibodies

## Datasheet for ABIN3083784 MFGE8 Protein (AA 24-387) (His tag)

Image

## Overview

| Quantity:                     | 1 mg   |
|-------------------------------|--|
| Target:                       | MFGE8  |
| Protein Characteristics:      | AA 24-387  |
| Origin:                       | Human  |
| Source:                       | Insect Cells   |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This MFGE8 protein is labelled with His tag.                         |
| Application:                  | Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys) |

## Product Details

| Sequence:        | LDICSKNPCH NGGLCEEISQ EVRGDVFPSY TCTCLKGYAG NHCETKCVEP LGMENGNIAN                             |

|                  | SNDSANWTEY QDPRTGSSKI FPGNWDNHSH KKNLFETPIL ARYVRILPVA WHNRIALRLE LLGC                        |
|                  | Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a    |
|                  | special request, please contact us.   |
| Characteristics: | Made in Germany - from design to production - by highly experienced protein experts.          |
|                  | Human MFGE8 Protein (raised in Insect Cells) purified by multi-step, protein-specific process |
|                  | to ensure crystallization grade.  |
|                  | State-of-the-art algorithm used for plasmid design (Gene synthesis).                          |

| Product Details   |  |
|-------------------|--|
|                   | This protein is a made to order protein and will be made for the first time for your order. Our  |
|                   | experts in the lab will ensure that you receive a correctly folded protein.  |
|                   | The big advantage of ordering our made-to-order proteins in comparison to ordering custom  |
|                   | made proteins from other companies is that there is no financial obligation in case the protein  |
|                   | cannot be expressed or purified.   |
|                   | In the unlikely event that the protein cannot be expressed or purified we do not charge anything   |
|                   | (other companies might charge you for any performed steps in the expression process for  |
|                   | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression   |
|                   | experiments or purification optimization).   |
|                   | When you order this made-to-order protein you will only pay upon receival of the correctly   |
|                   | folded protein. With no financial risk on your end you can rest assured that our experienced   |
|                   | protein experts will do everything to make sure that you receive the protein you ordered.  |
|                   | The concentration of our recombinant proteins is measured using the absorbance at 280nm.   |
|                   | The protein's absorbance will be measured in several dilutions and is measured against its   |
|                   | specific reference buffer.   |
|                   | The concentration of the protein is calculated using its specific absorption coefficient. We use   |
|                   | the Expasy's protparam tool to determine the absorption coefficient of each protein.   |
| Purification:     | Two step purification of proteins expressed in baculovirus infected SF9 insect cells:  |
|                   | <ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using three<br/>different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate<br/>fractions are analyzed by SDS-PAGE.</li> </ol> |
|                   | 2. Protein containing fractions of the best purification are subjected to second purification step<br>through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and<br>Western blot.  |
| Purity:           | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.   |
| Sterility:        | 0.22 µm filtered   |
| Endotoxin Level:  | Protein is endotoxin free.   |
| Grade:            | Crystallography grade  |
| Target Details    |  |
| Target:           | MFGE8  |
| Alternative Name: | MFGE8 (MFGE8 Products)   |
|                   |  |

Plays an important role in the maintenance of intestinal epithelial homeostasis and the

Background:

## Target Details

Expiry Date:

| -                   |   |
|---------------------|---|
|                     | promotion of mucosal healing. Promotes VEGF-dependent neovascularization (By similarity).         |
|                     | Contributes to phagocytic removal of apoptotic cells in many tissues. Specific ligand for the     |
|                     | alpha-v/beta-3 and alpha-v/beta-5 receptors. Also binds to phosphatidylserine-enriched cell       |
|                     | surfaces in a receptor-independent manner. Zona pellucida-binding protein which may play a        |
|                     | role in gamete interaction. Binds specifically to rotavirus and inhibits its replication.         |
|                     | {ECO:0000250, ECO:0000269 PubMed:19204935}., Medin is the main constituent of aortic              |
|                     | medial amyloid. {ECO:0000269 PubMed:19204935}.  |
| Molecular Weight:   | 41.7 kDa Including tag.   |
| UniProt:            | Q08431  |
| Pathways:           | SARS-CoV-2 Protein Interactome  |
| Application Details |   |
| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies |
|                     | as well. As the protein has not been tested for functional studies yet we cannot offer a          |
|                     | guarantee though.   |
| Comment:            | In cases in which it is highly likely that the recombinant protein with the default tag will be   |
|                     | insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to     |
|                     | increase solubility. We will discuss all possible options with you in detail to assure that you   |
|                     | receive your protein of interest.   |
| Restrictions:       | For Research Use only   |
| Handling            |   |
| Format:             | Liquid  |
| Buffer:             | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.        |
| Handling Advice:    | Avoid repeated freeze-thaw cycles.  |
| Storage:            | -80 °C  |
| Storage Comment:    | Store at -80°C.   |
|                     |   |
