# MFGE8 Protein (AA 268-317) (His tag)

Image

Go to Product page

#### Overview

1 mg  MFGE8  AA 268-317  Human  Escherichia coli (E. coli)  Recombinant  This MFGE8 protein is labelled with His tag.  Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)  RLDKQGNFNA WVAGSYGNDQ WLQVDLGSSK EVTGIITQGA RNFGSVQFVA
Human  Escherichia coli (E. coli)  Recombinant  This MFGE8 protein is labelled with His tag.  Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)  RLDKQGNFNA WVAGSYGNDQ WLQVDLGSSK EVTGIITQGA RNFGSVQFVA

Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
special request, please contact us.
<ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Human MFGE8 Protein (raised in E. Coli) purified by multi-step, protein-specific process to ensure crystallization grade.</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul>
This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.  The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

In the unlikely event that the protein cannot be expressed or purified we do not charge anything (other companies might charge you for any performed steps in the expression process for custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression experiments or purification optimization).

When you order this made-to-order protein you will only pay upon receival of the correctly folded protein. With no financial risk on your end you can rest assured that our experienced protein experts will do everything to make sure that you receive the protein you ordered. The concentration of our recombinant proteins is measured using the absorbance at 280nm. The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.

The concentration of the protein is calculated using its specific absorption coefficient. We use the Expasy's protparam tool to determine the absorption coefficient of each protein.

#### Purification:

Two step purification of proteins expressed in bacterial culture:

- 1. In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.
- 2. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.

Purity:

>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.

Sterility:

0.22 µm filtered

Endotoxin Level:

Endotoxin has not been removed. Please contact us if you require endotoxin removal.

Grade:

Crystallography grade

### **Target Details**

Target:	MFGE8
Alternative Name:	MFGE8 (MFGE8 Products)
Background:	Plays an important role in the maintenance of intestinal epithelial homeostasis and the
	promotion of mucosal healing. Promotes VEGF-dependent neovascularization (By similarity).
	Contributes to phagocytic removal of apoptotic cells in many tissues. Specific ligand for the
	alpha-v/beta-3 and alpha-v/beta-5 receptors. Also binds to phosphatidylserine-enriched cell
	surfaces in a receptor-independent manner. Zona pellucida-binding protein which may play a
	role in gamete interaction. Binds specifically to rotavirus and inhibits its replication.

## **Target Details**

Storage Comment:

Expiry Date:

Store at -80°C.

Unlimited (if stored properly)

Target Details	
	{ECO:0000250, ECO:0000269 PubMed:19204935}., Medin is the main constituent of aortic
	medial amyloid. {ECO:0000269 PubMed:19204935}.
Molecular Weight:	6.4 kDa Including tag.
UniProt:	Q08431
Pathways:	SARS-CoV-2 Protein Interactome
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a
	guarantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be
	insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to
	increase solubility. We will discuss all possible options with you in detail to assure that you
	receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
