

Datasheet for ABIN3083799 MIDN Protein (AA 1-468) (Strep Tag)

Overview

Quantity:	250 µg
Target:	MIDN
Protein Characteristics:	AA 1-468
Origin:	Human
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This MIDN protein is labelled with Strep Tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS)

Product Details

Brand:	AliCE®
Sequence:	MEPQPGGARS CRRGAPGGAC ELGPAAEAAP MSLAIHSTTG TRYDLAVPPD ETVEGLRKRL
	SQRLKVPKER LALLHKDTRL SSGKLQEFGV GDGSKLTLVP TVEAGLMSQA SRPEQSVMQA
	LESLTETQVS DFLSGRSPLT LALRVGDHMM FVQLQLAAQH APLQHRHVLA AAAAAAAAG
	DPSIASPVSS PCRPVSSAAR VPPVPTSPSP ASPSPITAGS FRSHAASTTC PEQMDCSPTA
	SSSASPGAST TSTPGASPAP RSRKPGAVIE SFVNHAPGVF SGTFSGTLHP NCQDSSGRPR
	RDIGTILQIL NDLLSATRHY QGMPPSLAQL RCHAQCSPAS PAPDLAPRTT SCEKLTAAPS
	ASLLQGQSQI RMCKPPGDRL RQTENRATRC KVERLQLLLQ QKRLRRKARR DARGPYHWSP
	SRKAGRSDSS SSGGGGSPSE ASGLGLDFED SVWKPEVNPD IKSEFVVA
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression
	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.

Product Details

Characteristics:

Key Benefits:

- Made in Germany from design to production by highly experienced protein experts.
- Protein expressed with ALiCE® and purified in one-step affinity chromatography
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Expression System:

- ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
 protein production are removed, leaving only the protein production machinery and the
 mitochondria to drive the reaction. During our lysate completion steps, the additional
 components needed for protein production (amino acids, cofactors, etc.) are added to
 produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).
Grade:	custom-made

Target Details

Target:	MIDN
Alternative Name:	MIDN (MIDN Products)
Background:	Midnolin (Midbrain nucleolar protein),FUNCTION: Facilitates the ubiquitin-independent
	proteasomal degradation of stimulus-induced transcription factors such as FOSB, EGR1,
	NR4A1, and IRF4 to the proteasome for degradation (PubMed:37616343). Promotes also the
	degradation of other substrates such as CBX4 (By similarity). Plays a role in inhibiting the
	activity of glucokinase GCK and both glucose-induced and basal insulin secretion.
	{EC0:0000250 UniProtKB:D4AE48, EC0:0000250 UniProtKB:Q3TPJ7,
	ECO:0000269 PubMed:37616343}.
Molecular Weight:	49.2 kDa
UniDrati	Q504T8
UniProt:	Q50416
Application Details	Q30416
